**HOBBS
MUNICIPAL
SCHOOLS**

**Preventive Maintenance Plan
Introduction, Purpose, Mission and
Policy Statement**

Policy # 1.0

INTRODUCTION

The Superintendent of Hobbs Municipal Schools is responsible for maintaining safe, clean and attractive school facilities and grounds. The superintendent shall keep the Board of Education advised of short-range and long-range needs, and shall advise the board as to the appropriate sources and balances of funding from operational funds, bond issues, capital improvements, and any other applicable state or federal procurement methods.

A program to provide effective security for all school property, including vandalism and protection, is to be developed and periodically reviewed. It shall be the responsibility of the superintendent to ensure that the safety of students and employees is a primary consideration in the development and maintenance of school facilities, school grounds, and other facilities of the district; and in the planning and implementation of all school programs and activities. All employees, students, and patrons are encouraged to be safety-conscious, and to make recommendations to the administration for the improvement of safety elements.

PURPOSE / MISSION

The purpose of the Hobbs Municipal Schools' Preventive Maintenance Program is to ensure that our district will properly maintain its facilities and equipment so that they are fully-operational to effectively support our instructional programs and activities. It incorporates the diverse facility requirements of all the buildings and grounds of our district. We will endeavor to execute this program, thereby enhancing the learning environment by reducing classroom disruptions and minimizing long-term investment in equipment repairs.

This program contains all of the detailed procedures associated with the facilities' preventive maintenance program. If effectively implemented, this plan will meet state statute maintenance guidelines and effectively manage the costs associated with maintenance and operations. The preventive maintenance plan will be updated periodically, to incorporate facility and equipment changes, resource adjustments, and new maintenance technologies. Any changes to procedures or guidelines shall be reviewed and approved by the Director of Operations or designee.

The mission of Hobbs Municipal Schools' Maintenance Department is to provide a safe, clean and healthy learning environment for the students and staff, and to ensure that facility systems and equipment are well-maintained so that classroom disruptions are minimized.

**HOBBS
MUNICIPAL
SCHOOLS**

**Preventive Maintenance Plan
Introduction, Purpose, Mission and
Policy Statement**

Policy # 1.0

DESCRIPTION

The preventive maintenance program is the core for effectively managing maintenance programs for facilities. The program provides the maintenance organization with the means to plan, acquire, organize, direct, control and evaluate manpower and materials and resources expended or planned for expenditure, in support of the district's maintenance and mission statement. The District leadership, Director of Maintenance and maintenance personnel must recognize the importance of the program and understand their role in assisting management to maintain the reliability of critical systems and building components at designed levels of reliability.

POLICY

The Hobbs Municipal School District has created a preventive maintenance plan to ensure the district properly maintains its facilities, mechanical systems and equipment so they are efficiently operational, providing a comfortable and safe environment for its students, staff, and guests by performing scheduled routine maintenance. This Preventive Maintenance Plan is an overview of the District's program.

It is the policy of the Hobbs Municipal Schools to utilize the SchoolDude maintenance software package (MaintenanceDirect, PMDirect and UtilityDirect), to implement an effective and quality preventive maintenance plan inclusive of specific and unique equipment inventory and preventive maintenance schedules.

OBJECTIVES

The primary objective of the preventive maintenance program is to manage the maintenance processes in a manner which will ensure maximum equipment operational reliability. The intermediate objectives of the district's preventive maintenance program are as follows:

- a. Achievement and participation of a uniform maintenance standard and criteria
- b. Effective use of available manpower and material resources
- c. Documentation of information relating to maintenance and maintenance support activities
- d. Improvement of maintenance and reliability of utility systems and equipment by provision of documented maintenance information and analysis
- e. Providing a means for reporting building configuration changes
- f. Effective and responsible use of resources and materials

**HOBBS
MUNICIPAL
SCHOOLS**

**Preventive Maintenance Plan
Introduction, Purpose, Mission and
Policy Statement**

Policy # 1.0

- g. Reduction of the costs through development of effective preventive maintenance programs to prevent accidental material damage to systems and equipment
- h. Providing the means to schedule, plan, manage and track maintenance activities
- i. Provision of data on which to base improvements in equipment design and spare parts
- j. Create effective policies and programs in support of a quality and safe maintenance culture

SCOPE

This preventive maintenance program is fully applicable to Hobbs Municipal School District in assisting directors, maintenance supervisors and maintenance staff with the development of equipment inventories and effective processes to maintain the equipment, and associated systems in the facility at designed levels of efficiency and reliability.

It is the policy of Hobbs Municipal Schools to utilize the SchoolDude modules to implement an effective and quality preventive maintenance program inclusive of the development of a unique inventory, preventive maintenance schedules and strategies, maintenance work order processes and utility billing tracking and monitoring activities.

PREVENTIVE MAINTENANCE PROGRAM

The preventive maintenance program provides a simple and standard means for planning, scheduling, controlling and performing planned maintenance on all equipment, and represents an effective means for using available maintenance resources. The Director of Maintenance is responsible for the implementation and management of the preventive maintenance program for the district.

Preventive maintenance actions are the minimum requirement to maintaining equipment in a fully-operable condition, and within specifications. If performed according to schedule, these maintenance actions will provide improved equipment efficiency and reliability. Preventive maintenance guidelines and the schedules at which they are to be accomplished are developed based on specific equipment operating and maintenance manuals, manufacturer recommendations and the NM Groups Classification Types (NMGCT). These guidelines provide the detailed procedures for performing the preventive maintenance tasks and identify who, what, when, how and with what resources a preventive maintenance task is to be accomplished.

**HOBBS
MUNICIPAL
SCHOOLS**

**Preventive Maintenance Plan
Introduction, Purpose, Mission and
Policy Statement**

Policy # 1.0

Equipment identification records are developed as a part of the program's integrated logistics support effort for all new procurements, re-procurements, alterations and modifications of equipment and associated systems. Preventive maintenance guidelines also provide spare parts specifications and consumable item listings for improved planning and preparation and cost effectiveness.

PREVENTIVE MAINTENANCE PLAN REVIEW AND REVISION

1. At least annually, the Preventive Maintenance Plan is evaluated for objectives, scope, performance, and effectiveness of the plan.
2. The maintenance management plan is reviewed annually, and revised as appropriate with final approvals from the district administration / board.
3. The Director of Maintenance or designee is responsible for preparing the evaluation.
4. School leadership and staff are provided copies of the evaluation for their review and approval.
5. Changes to the policy will be communicated to the district leadership annually, unless the changes are due to local, state or federal regulatory guidelines requiring immediate implementation. In this case, a memorandum explaining the change will be communicated to all leadership and staff affected by the change.

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Maintenance Goals</p>	<p>Policy # 2.0</p>
--	---------------------------------	----------------------------

POLICY

It is the policy of the Hobbs Municipal Schools to create a list of reasonable goals for the maintenance program in an effort to identify opportunities for improvements in critical or weak areas of the department. The following goals for the 2023-2024 school year have been created and include a plan of action and timelines for completion.

MAINTENANCE PERFORMANCE GOALS 2024-2025

1. Provide training for personnel to continue their professional development
 - a. Playground Inspectors
 - b. Electricians
 - c. Plumbers
 - d. Irrigation
 - e. Pesticide Applicators
 - f. Forklift and Scissor Lift
2. Continue Safe Schools training for all maintenance staff
3. Continuation of Custodial Staff quarterly training
4. Continue to update various irrigation systems to conserve resources
5. Maintaining all district schools' scores of 90% or higher on FMAR system
6. Continue to update the plumbing in the District
7. Maintain PPE and practices for safe and sanitary virus prevention

PREVIOUSLY ACCOMPLISHED MAINTENANCE

GOALS 2023-24 Accomplishments

1. Provided Training for Various Personnel (Including Forklift and Scissor Lift Training)
2. Custodial and Maintenance staff are utilizing SafeSchools Training monthly
3. Completed Updating of Various Irrigation Systems
4. All but four schools have scores of 90% or higher
5. Upgraded the HVAC at Tydings Auditorium, HHS SPED 100 Wing, Jefferson Elementary, and Sanger Elementary.

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Maintenance Organizational Structure & Staffing Responsibilities</p>	<p>Policy # 3.0</p>
--	--	----------------------------

POLICY

It is the policy of the Hobbs Municipal School District to establish a routine maintenance staffing and organizational structure and staffing responsibilities, to define effective lines of communication and approval processes.

PROCEDURE

The Hobbs Municipal School District has developed the attached maintenance organizational chart structure.

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Maintenance Organizational Structure & Staffing Responsibilities</p>	<p>Policy # 3.0</p>
--	--	----------------------------

This page intentionally left blank for insertion of Organization Chart (3.1-Attachment). SED

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Maintenance Organizational Structure & Staffing Responsibilities</p>	<p>Policy # 3.0</p>
--	--	----------------------------

All of the following positions are responsible to the district's safety policies and procedures.

DIRECTOR OF OPERATIONS: The Director of Operations provides direct supervision to the Director of Maintenance. He secures necessary funds and resources, to provide quality assurance for facilities and grounds, and ensures the district's safety plan is implemented.

DIRECTOR OF MAINTENANCE: The Director of Maintenance is responsible for supervision of all maintenance repairs, renovations, and services at Hobbs Municipal Schools, to include grounds, carpentry, electrical repairs, plumbing, welding, and vandalism cleanup. He also shares supervision of custodial staff with the school principals, and is responsible for conducting Custodial In-services. He identifies needs and establishes maintenance goals; compiles/approves a work schedule for staff; and assigns and evaluates the work of the maintenance staff. He performs security checks of buildings and grounds as needed, and makes himself available to staff for consultation on any problems. The Director of Maintenance reviews and approves purchase requests from subordinates; attends meetings and training; conducts training for staff; and develops and conducts pre-maintenance programs.

DIRECTOR OF ENERGY: The Director of Energy oversees the district's conservation of energy and natural resources. He maintains accurate records of energy consumption and costs, and conducts energy audits. He is responsible for maintaining the SchoolDude UT Direct module, and submitting monthly/quarterly reports.

ASSISTANT DIRECTOR OF MAINTENANCE: The Assistant Director of Maintenance assists the Director of Maintenance in the running of the department, and takes responsibility of the department when the director is out. He assists the technicians with work, and helps oversee quality of work. He helps with after-hours calls, as needed.

GROUNDS SUPERVISOR: The Grounds Supervisor compiles/approves a work schedule for the Grounds Department, including Grounds Keepers and Irrigation. He supervises the department, and assists them with their work. The Grounds Supervisor maintains a NM Department of Agriculture Pesticide Applicator's license; and oversees proper storage, handling and application of chemicals.

WAREHOUSE SUPERVISOR: The Warehouse Supervisor manages the Warehouse, keeping inventory of supplies; overseeing the delivery of supplies to all HMS facilities; and inspecting materials delivered by vendors to verify accuracy and completeness of orders. The Warehouse Supervisor compiles/approves a work schedule for, and supervises, the delivery drivers.

ADMINISTRATIVE ASSISTANT: The Administrative Assistant manages the Maintenance Department office and assists the Director of Operations, Director and Assistant Director of Maintenance, and Grounds and Warehouse Supervisors. She is responsible for record-keeping, scheduling and assisting with Maintenance and Custodial In-services, assisting with work schedules and preparing reports as needed. The Administrative Assistant maintains the district's SchoolDude MaintenanceDirect and PMDirect modules, from setting up facilities, routing, users and PM Schedules, to assigning work orders, contacting contractors, entering all data and transactions. She is responsible for the bid process and

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Maintenance Organizational Structure & Staffing Responsibilities</p>	<p>Policy # 3.0</p>
--	--	----------------------------

purchase of materials and services for the Maintenance Department and Warehouse. The Administrative Assistant maintains and processes personnel/payroll information for the Maintenance Department and Warehouse year-round, and custodial staff during the summer.

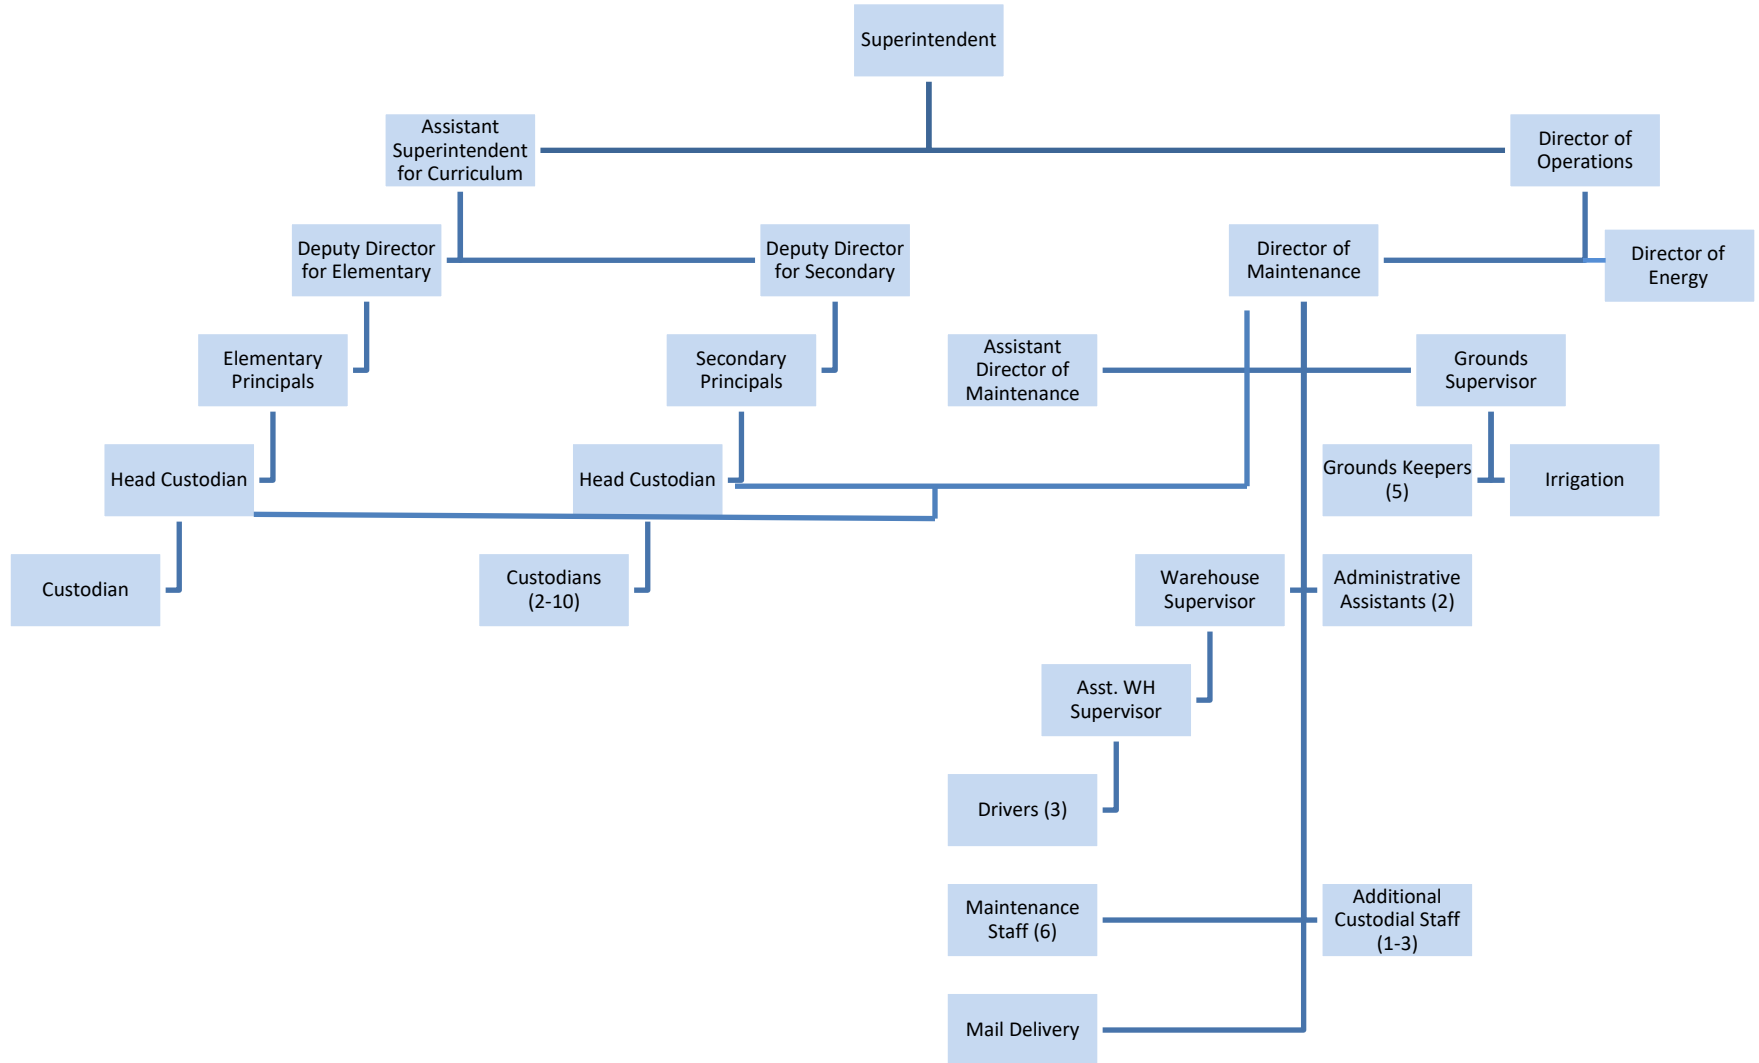

GROUNDS KEEPERS/IRRIGATION: The Grounds Department performs landscaping duties for Hobbs Municipal School District, including mowing, pruning trees, applying fertilizer and various grounds chemicals, maintaining all irrigation systems, vehicle/grounds equipment maintenance, snow removal when necessary. They are also responsible for assisting other departments when needed.

ASST. WH SUPERVISOR/DRIVERS: The Asst. WH Supervisor takes responsibility for the Warehouse in the Warehouse Supervisor’s absence. The Drivers are responsible for delivering hot meals to 16 schools during the school year, as well as delivering all merchandise ordered by schools from the Warehouse and/or vendors.

MAINTENANCE STAFF/MAIL DELIVERY: The Hobbs Municipal School District’s Maintenance Department is currently comprised of two (2) Carpenters, one (1) Electrician, one (1) HVAC Technician, one (1) Locksmith, and one (1) Plumber, who perform their specialties throughout the district, as well as assisting each other when necessary. The Mail Delivery personnel is responsible for delivering all internal and external mail throughout the district.

HEAD CUSTODIAN: The Head Custodian is responsible for compiling a work schedule for his/her facility’s custodial staff, as well as checking the building each day it is vacant. Throughout the work week, the Head Custodian performs all custodial duties, alongside the other custodians in the building.

CUSTODIAN/ADDITIONAL CUSTODIAL STAFF: The Custodians are responsible and accountable for performing custodial duties at their school campus. Typical duties and responsibilities include, but are not limited to: sweeping; dusting; wet and dry mopping; stripping, waxing and/or buffing floors; vacuuming and shampooing carpets; cleaning and sanitizing cafeteria tables; cleaning and sanitizing restrooms, dusting and washing walls, ceilings, furniture, vents, interiors, desks, lights and light fixtures; cleaning, polishing and straightening offices; emptying waste baskets; cleaning whiteboards and chalkboards. The additional custodial staff is sent to various facilities throughout the district, in the absence of Custodians. Although the above are typical of the duties and responsibilities normally performed, additional duties and responsibilities requiring the same or lesser skills, knowledge and dexterity may be required.

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Maintenance Priorities and Procedures</p>	<p>Policy # 4.0</p>
--	---	----------------------------

POLICY

Routine Maintenance Work Orders

The Hobbs Municipal School District currently processes maintenance work orders through the state-funded SchoolDude MaintenanceDirect work order system. Requesters and/or Site Administrators provide work requests via the internet, which the Director of Maintenance reviews and approves. They are then assigned to the technicians. On some occasions requests are sent via email to the Administrative Assistant, who then creates work orders as appropriate and assigns to the technicians. If a technician identifies a problem, they correct the issue and have the Administrative Assistant create a work order. All Closed (routine and PM) work orders must have the following required fields populated in order to maintain a level of high quality and integrity:

NEW REQUESTS SHOULD ALWAYS INCLUDE:	CLOSED WORK ORDERS TO BE FULLY DOCUMENTED WITH:
Requester	Labor Hours
Work Description	Materials/Contract Costs
Location of Work	Responsible Party (Who Completed the Work)
Craft (Type of Work)	Action Taken to Resolve Problem (What was Done)
Purpose Code (Reason for Work)	

Reports from the MaintenanceDirect work order system are used by various district staff for continuous improvement of operations, as well as record-keeping.

Preventive Maintenance Work Orders

The Hobbs Municipal School District preventive maintenance work orders are scheduled in the PMDirect module of SchoolDude. The work orders are automatically generated and the Director of Maintenance/Administrative Assistant assigns the work orders to the appropriate technician or service contractor for completion and documentation.

The following chart is an example of the work order and preventive maintenance work order process.

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Maintenance Priorities and Procedures</p>	<p>Policy # 4.0</p>
--	---	----------------------------

This page intentionally left blank for insertion of Maintenance Priorities and Procedures (4.1-Attachment). SED

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Maintenance Priorities and Procedures</p>	<p>Policy # 4.0</p>
--	---	----------------------------

DEFINED PRIORITIES

The Hobbs Municipal School District has established the following work priority definitions for the Maintenance Department for effective response to requested work requests through the Facility Information Management System (FIMS) program.

EMERGENCY is reserved for those projects, which truly stop the use of the facility. The response time should be made within 15 minutes of notification of the problem. Work on emergency priority requests commences immediately and continues until the facility is restored to sufficient use.

SAFETY is assigned to those projects that are of life, health and safety in nature, and should be addressed in an urgent manner. The concern should be identified and secured within 15 minutes, and a solution be implemented as soon as possible.

HIGH is assigned to those projects, which while not completely prohibiting use of the facility, represent a threat to full facility use. The response time is normally started on the day it is reported.

MEDIUM is assigned to the majority of the work requests received. The response time is generally one to two days and may be remedied within three to five working days.

SCHEDULED is scheduling preventive maintenance actions of equipment and systems that require periodic inspections and maintenance to maximize equipment operational readiness.

LOW is used for those projects which are not necessarily required, but are desirable. As a general rule, work should commence within thirty days of receipt unless seasonal or other considerations allow or dictate a greater delay.

HOBBS MUNICIPAL SCHOOLS

Maintenance Priorities and Procedures

Policy # 4.1

Authorized Personnel Submits Work Order; or PM Work Order is Automatically Generated.

Administrative Assistant or Director of Maintenance Reviews, Approves and Assigns (or Declines).

*Technician * or Contractor** Performs Work. *Tech completes work order, listing hours/ materials; Admin Asst enters into database and closes work order.
**Contractor completes work and submits invoice to Maintenance Office. Admin Asst enters costs for materials/labor into database and closes work order; then submits invoice to Business Office for payment.*

Principal or Designated Staff Approves or Declines. (If declined, facility personnel reassess.)

If Approved, Administrative Assistant Prints and Forwards to Technician or Contractor.

 HOBBS MUNICIPAL SCHOOLS	Inspection and Maintenance Schedules	Policy # 5.0
---	---	---------------------

POLICY

The accomplishment of scheduled inspection and preventive maintenance tasks is critical to the successful operation of the Hobbs Municipal School District.

PROCEDURE

1. A unique inventory of all equipment is created prior to adding equipment into the maintenance management program.
2. This inventory shall be kept current and reviewed for accuracy on a routine schedule, but no less than annually.

Prescribed equipment inventories, maintenance schedules and PM frequencies and inspection tasks have been developed for each facility.

Attachments:

1. Unique list of major facility equipment inclusive in the PM program (HVAC, Life Safety, Structures, Utilities, Plumbing, etc.)
2. PM Task List
3. District Facilities Floor Plans

---	--	---

POLICY

It is the policy of the Hobbs Municipal School District to utilize the SchoolDude Facility Information Management System in development of Preventive Maintenance tasks for equipment associated with the district sites. In addition, the District shall use the New Mexico GCT's to develop preventive maintenance equipment schedules, frequencies and tasks.

PROCEDURE

The following are samples of HMS tasks associated with the SchoolDude PM Direct Module (4 Attachments).

PM Schedule Template Details

ID/Title 36393

Coronado Generator Inspection, Quarterly

Group Services

Manufacturer

Classification Electrical Equip. & Systems

Location

Type

Frequency Monthly

This event recurs on the first Monday of every 3 month(s).

Safety Points

1. Hearing protection is required whenever the engine is running.
2. Allow no open flames or smoking in the area.

Job Startup Procedures

This maintenance task applies to all permanently installed electric generators used for providing emergency electrical power.

Special Instructions:

1. Review manufacturer's instructions. One copy of the instruction manual(s) shall be kept in a secure, convenient location near the equipment and another kept in a different source location.
2. The work required by this procedure may cause the activation of an alarm and/or a supervisory signal. The school maintenance manager and/or fire department that will receive the alarm and/or signal must be notified prior to start and at the completion of work.
3. Qualified operating personnel shall be in attendance during the monthly generator operation.
4. Records of changes to the emergency electrical system should be maintained so that the demand likely to be produced by the connected load will be within the available capacity.
5. Review Procedure for 'Emergency Eyewash and Shower Equipment'. Note the location of emergency eyewash and/or shower equipment.
6. Review Procedure for 'Controlling Hazardous Energy Sources.'
7. A written record of all inspections, service, tests, exercising, operation, and repairs to the emergency generator shall be maintained in an equipment log book and kept on the premises. This record shall include the date of maintenance, identification of service personnel, and notation of any unsatisfactory condition and the corrective action taken, including parts replaced.
8. Have a properly serviced fire extinguisher in proper working order on hand.
9. If the unit has a self-contained fuel tank, use only Underwriters Laboratories listed safety cans for fuel transfer.

Job Tools

- Standard Tools – Basic
- Insulated pliers and screwdrivers
- Wire strippers
- Wire crimpers
- Voltmeter - Ohmmeter - Milliammeter
- Clamp on meter (volt - ohm - amp meter)
- Soldering kit
- 1/8' 25' fish tape
- Burnishing tool
- Spare crankcase breather.
- Cleaning equipment and materials. Consult the MSDS for hazardous ingredients and proper personal protective equipment (PPE).

Tasks and Procedures

- 1 - Clean the fuel strainer, filter, and dirt leg.**

Task Procedures

- 2 - Clean the crankcase breather, replace in accordance with manufacturer's instructions.**

Task Procedures

- 3 - Check the exhaust system for proper clearance and that insulation is complete.**

Task Procedures

If a portion of the building load cannot be connected, a resistance load should be used. The electrical load shall be not less than fifty percent of the total connected EPSS load (not less than thirty percent of the EPS nameplate rating and preferably at least fifty percent of the EPS nameplate rating). NOTE: If the generator set is used for standby power or for peak load shaving, these uses

PM Schedule Template Details

shall be recorded and may be substituted for task scheduled operations and testing of the generator set if the appropriate data is also recorded.

4 - Check that battery terminals are clean and cable connections are tight.

Task Procedures

5 - Check that where wires are subject to movement that chafing has not occurred.

Task Procedures

ID/Title 40320

Elevator Inspection, Quarterly

Group Services

Manufacturer

Classification Conveying Systems

Location

Type Elevators

Frequency Monthly

This event recurs on the first Monday of every 3 month(s).

Safety Points

1. Review Procedure on 'Controlling Hazardous Energy Sources.'
2. Consult the Material Safety Data Sheet (MSDS) for hazardous ingredients and proper Personal Protective Equipment (PPE).

Job Startup Procedures

1. Check manufacturer's instructions; those that have more stringent task lines for preventive maintenance shall be followed. The frequencies shown here are minimum requirements and are in addition to the regular PBS inspection tour. Items regularly inspected on a weekly basis include the motor-generator unit, hoist machine, controls and governor. Doors, hangers, closers, interlocks and door operators should be checked frequently for proper operation by PBS elevator mechanics or contract inspectors as they ride the elevators. Items requiring attention should be reported to the facility maintenance manager or elevator contractor.
2. Review Procedure on 'Controlling Hazardous Energy Sources.'
3. Use energy efficient lighting to the fullest practical extent.
4. If materials to be worked on are known or suspected to contain asbestos, check the building's asbestos management plan to see if they have been tested for asbestos. If they are suspect but have not been tested, have them tested. Manage asbestos in accordance with the plan.
5. Comply with state and local codes as applicable.

Job Tools

- Standard and Phillips head screw drivers-various sizes
- Pliers-vise grip (2), slip joint, needle nose, diagonal, cutting pliers, side cutters
- Ball peen hammer
- Hack saw and spare blades
- 3/8' drive socket set and ratchet
- Small set of Allen wrenches
- Assorted center punches, drift punches, and steel chisel
- 12 inch measuring tape
- Crescent wrenches 4' to 8'
- Open and box end wrenches ¼' to ¾'
- File
- Pipe wrenches to 14'
- Small level and square
- Pocket knife
- Flashlights
- Grease guns and oilers
- Wire brush
- Extension cord and inspection lights
- Various cleaning tools - brushes, scrapers, etc
- Emery cloth
- Cleaning supplies and materials. Consult the Material Safety Data Sheet (MSDS) for hazardous ingredients and proper Personal Protective Equipment (PPE).
- Out of service signs.
- Barricades.
- Lubricants. Consult the MSDS for hazardous ingredients and proper PPE.

Tasks and Procedures

- 1 - Tasks: Inspect, clean, lubricate, and properly adjust all roller tasks, task shoes, and rail oilers.**

Task Procedures

- 2 - Car Tops: Remove all dirt, dust, and oil. Clean and lubricate fans.**

Task Procedures

- 3 - Emergency Lighting: Check the operation of the emergency lights; replace as necessary.**

Task Procedures

PM Schedule Template Details

4 - Solid State Components and Circuit Boards:

Task Procedures

Inspect printed circuit board and other solid state devices for cleanliness, condensation spots, evidence of heating and deterioration. Check and replace defective solid state devices.

5 - Leveling:

Task Procedures

Inspect leveling operation. Clean and lubricate switches, vanes, and all other related parts.

Adjust to obtain the proper leveling at all landings in both the UP and DOWN directions within ¼ inch above or below the landing sill.

6 - Clean up and remove all debris from work area.

Task Procedures

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Custodial Duties and Responsibilities</p>	<p>Policy # 7.0</p>
--	---	----------------------------

POLICY

It is the policy of the Hobbs Municipal School District to establish custodial duties and responsibilities, aligned with the job description, in an effort to assist in the timely coordination and completion of the routine preventive maintenance necessary for a clean, sanitary and well-kept facility. The following duties and responsibilities for the district have been developed as a guideline to assist in the effective management of custodial staff.

This is an outline to assist in the timely coordination and completion of the routine preventive maintenance necessary for a clean, sanitary and well-kept work area.

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Custodial Duties and Responsibilities</p>	<p>Policy # 7.1</p>
--	---	----------------------------

PROCEDURES – GENERAL MAINTENANCE

DAILY

1. Raise flag at 8:00 a.m.
2. Sweep sidewalks and entryways. Pickup cigarette butts.
3. Remove trash from playground areas, lawns, shrubs, bushes, sidewalks & parking lots.
4. Replenish restroom supplies.
5. Replace damaged and soiled ceiling tiles as needed.
6. Replace burned out and flickering lamps (light bulbs), as needed.
7. Check boiler, mechanical, and electrical rooms; listen for unusual noises; check for excessive heat and equipment vibrations.
8. Ensure doors, windows and roof accesses are secured nightly.

WEEKLY

1. Inspect exterior building lighting for broken bulbs, etc.
2. Inspect parking lot and site lighting.

MONTHLY

1. Perform monthly fire extinguisher inspection.

PERIODICALLY

1. Inspect and repair curbs, walks and paving.
2. Inspect and restore signage.
3. Inspect gutter and downspouts; remove debris.
4. Verify that there is adequate supply of lamps, etc.
5. Remove trash and debris from parking lots.
6. Inspect and restore pavement markings.
7. Inspect all restroom, shower rooms and water closets.
8. Check all door operations and adjust hardware (including overhead doors and operators).
9. Inspect and repair all finished surfaces.
10. Check for tripped circuit breakers.
11. Check elevators and dock levelers for proper operations.
12. Remove snow and ice accumulations from sidewalks and entry areas.
13. Rotate all plumbing fixture shut-off valves (below sinks and behind commodes).
14. Rotate all outside hose-bib valves.
15. Inspect and test all lighting fixtures.

16. Inspect site:

- Fence
- Grounds
- Pavement
- Retaining Wall
- Storm Drainage System

17. Building Exterior

- Dock
- Entrances
- Landscaping
- Outside Storage Area
- Parking Lot
- Sidewalk
- Utility Enclosures for trash and debris

18. Building Interior

- Auditorium
- Classrooms
- Common Areas
- Computer Room
- Conference Room
- Corridors/Hallways
- Electrical Room
- Elevator
- Elevator Equipment Room
- Gymnasium
- Janitorial Room
- Mechanical room
- Offices
- Restrooms
- Shower/Locker Room
- Stairwell

 HOBBS MUNICIPAL SCHOOLS	District Facilities and Equipment	Policy 8.0
---	-----------------------------------	------------

POLICY

The Hobbs Municipal School District shall maintain a current & accurate listing of all schools within the district.

PROCEDURE

The district shall maintain a current and accurate listing of all schools within the district, which includes the following:

1. School Name and classification (Elementary, Middle, High)
2. Site Location and address
3. Square footage and acreage of sites
4. Student Census Information (MEM Count)

As of January 1, 2024, The Hobbs Municipal School District maintains 19 School facilities, and seven (7) Administrative & Support facilities, located on over 200 acres. (See 8.1-Attachment 1.)

The Hobbs Municipal School District's floor plans may be viewed on 8.2-Attachment 2.

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Planned Maintenance and Repair Projects</p>	<p>Policy 9.0</p>
--	--	-------------------

POLICY

It is the policy of the Hobbs Municipal School District to develop criteria, based upon the results of inventories and evaluation of their severity through the work order data collection and evaluation system and routine safety inspections, to implement a plan to develop and meet the needs of the districts planned maintenance and repair projects through the *Facility Information Management System (FIMS)*.

PROCEDURE

Through the maintenance department’s data collection processes within the facility information management system, a list of major capital repair projects (structural or equipment) will be collected on an ongoing basis. The list will be reported to the district leadership for review no less than quarterly for the purposes of the development of a plan of correction to the identified variances.

As necessary, this list shall be integrated with the 5 Year *Facility Master Plan* no less than annually.

 HOBBS MUNICIPAL SCHOOLS	Maintenance Staff Development	Policy 10.0
---	-------------------------------	-------------

POLICY

It is the policy of Hobbs Municipal School District to encourage the development of continued education and staff development for maintenance and custodial staff.

Building maintenance has become a sophisticated process with new equipment, advancement in technologies, automated controls, computer maintenance management software, improvements in products and materials and many others. As a result, maintenance and custodial personnel are required to have advanced technical skills to maintain the electrical, mechanical and special systems in operation. To accomplish tasks associated with these building components a formal staff development path and training methods should be presented and selected individuals should attend courses for required continued education on the latest and evolving technical skills and trades.

PROCEDURE

Maintenance Staff Development

1. Maintenance and custodial staff are required to attend courses and trainings that can enhance and update their skill sets.
2. Employees who are sent to training are expected to complete course work and integrate the information into their work routines and provide training to others.
3. At a minimum, all required safety training shall be kept up to date beginning with annual training and annually thereafter (i.e. Asbestos, Bloodborne Pathogens, PPE, SDS, etc.)
4. The Director of Maintenance or designee will be responsible for creating an annual calendar of events for general training and continued education and create a plan to meet the needs of the required training for skilled staff.
5. Records of training will be kept in an employee file.

See Attachments 10.1 - 10.3

HMS Custodial Staff Meeting -October 11, 2023, 8:30 am

- **Building Security-** check campuses daily
 - Spray bottles must be labeled.
- **Safety Reminders**
 - Custodians must assist Delivery Drivers daily (unloading & loading food carts)
 - All doors (except the front door) must remain locked and closed during the day
 - Do not use Electrical/Mechanical Rooms for storage; must have 3 feet of access around all electrical panels
 - Ladders in mechanical rooms must be accessible per School Insurance
- Juanita Castillo- Lead District Custodian
 - Be sure trash is picked up outside
 - Keep up with the maintenance of your floor machines, put in WOs for issues, but remember custodians are responsible for keeping those machines clean/working
 - Fire extinguisher checks to be done monthly
 - SafeSchools are due monthly, they are mandatory, so make time to do them
 - Site-based management was discussed
 - Custodians are responsible for their entire campus, not just sections. HMS reiterates working as a team and "all other duties as assigned"
- Mark Kerby- Maintenance Director- uniforms update, Mark to get fertilizer spreaders for every campus to spread the ice melt
- Doug Young- Operations Director- Bad weather information- staff to report on time as safely as possible, custodians to lay out ice melt in bus lanes/where teachers enter, a decision will be made by 8:30 if school will be canceled
- Cafeteria tables- please double-check that they are latched **** No students are allowed to assist in raising/lowering tables or benches**
- Playground Inspections- should be done daily
 - Check for needles, glass, broken equipment, etc.
- **Weekend/Holiday Building Checks (included in Head Custodians' contracts*)**
 - **Check your facilities (inside and out), specifically the following areas, each day facilities are vacant:**
 - All Doors and Windows
 - Entire Building/Playground Equipment for Graffiti/Vandalism (Call Warehouse and submit WO)
 - Leaks (plumbing, roof, etc.) – Inside and Outside (Call Warehouse and submit WO)
 - **Perform all other duties as assigned by the Principal**
 - On Holidays- all buildings to be checked by **10:00 am**

*In cases where the Head Custodian is unable to perform a building check, prior arrangements must be made for other custodian/school personnel to do so, for compensatory time (not red card).

Please submit who will be checking your buildings over the holidays (Thanksgiving and Christmas breaks) via email to Katelyn no later than Friday, November 3, 2023. On the building check email, please include your campus Principal, Mark, Juanita, and myself.

Miscellaneous Info

- **Thanksgiving Holiday: days off 22-26 (someone will have to check building(s))**
- **Christmas Holiday: days off Dec 25-Jan 5 (someone will have to check building(s))**
- Reporting of Leaks
- Email Katelyn with the total # of bags your campus needs for ice melt
 - Determine the type of leak (plumbing, HVAC, roof) before submitting work orders
- Check emails daily

- Make sure daily custodial duties are displayed on custodial room doors
- SafeSchools – New Staff to do onboard training with Juanita, Katelyn will assign/help with SafeSchools
- All maintenance/custodial requests **MUST** be submitted through a WO. If our Maintenance crew is at your campus working; do not pull them for other issues. You must follow the WO procedures.
- Work Orders- if you have any WO questions, please contact Tiah or Katelyn

- Work Orders- reminder each task/craft should be submitted separately. Ex. Do not combine a carpentry WO with a plumbing.

- For checking the status of a work order- call the Warehouse and have the WO number ready beforehand so Maintenance staff can better assist
- Uniforms- awaiting update from vendor

- **HVAC & Waste Management- Shawn Drake, Energy Manager**
 - **Large trash containers to be picked up daily**
 - **If the dumpster is overflowing set all overage beside the container, if drivers do not pick up the custodian's throw after it's been emptied**
 - **For Special events please remember to notify Shawn before the event**

- **Kristi Thompson, Mayfield- Demonstration**

- Notes:

** Handout- Agenda

POLICY

The Hobbs Municipal School District develops and maintains a written management plan describing the processes it implements to effectively manage the environment for the safety of students, staff, contractors, guests and other people coming to the district's facilities. This section includes Maintenance Safety, Maintenance Safety Goals and Maintenance Policies and Procedures.

PROCEDURE

1. The District identifies a person(s), as designated by leadership, to coordinate the development, implementation, and monitoring of the district's maintenance safety activities.
2. The entire school district's maintenance, grounds and custodial staff are oriented, trained and responsible to the safety management plan.
3. At new employee orientation an overview of the safety management plan is provided to each maintenance employee and includes:
 - General Safety
 - Personal Protective Equipment
 - Hazard Communication / SDS practices
 - General OSHA guidelines
 - Fire Safety Procedures and equipment
 - Lock Out/Tag Out
 - Emergency School Procedures
 - Security Procedures
 - Ladder Safety
 - Grounds keeping and General Tool Equipment Safety
 - Bloodborne Pathogens
 - CPR
 - Job-specific safety risks
 - Other (as determined by district plans)
4. A department-specific safety management plan orientation is provided to employees by their individual department manager.
5. Annually, all employees are provided re-education about the safety management plan.
6. All training classes that employees attend are documented in the employees' personnel file located in human resources.

Maintenance Safety

1. The maintenance department staff will adhere to all district safety rules as outlined in the District Safety Plan.
2. PPE (personal protective equipment) will be provided and utilized as appropriate for the tasks at hand. Some examples include: safety glasses/goggles, gloves, ear plugs, respirators etc.
3. All equipment operated by maintenance staff will be maintained such that all protective guards and shields are in place.
4. Maintenance staff are required to report any unsafe conditions to include employee injuries to their immediate supervisor and a district employee injury report completed and forwarded to the appropriate chain of command system.
 - Injured parties should seek immediate medical attention following the districts employee injury guidelines established.
 - All injuries will be reported to the principle and superintendent within 24 hours.
5. The maintenance department shall provide routine safety training to all maintenance and custodial related staff. Records, to include sign-in sheets, shall be maintained on all training activities.
6. Records should be kept in the employee's personnel files for any safety training accomplished.
7. Periodic safety inspections should occur and be documented so issues can be corrected.

Maintenance Goals

The district's Maintenance goals for 2023-24 include the following:

- a. Continue to provide a safe learning environment for students, staff and visitors.
- b. Continue weekly safety updates.
- c. Maintain postings of potential hazards in work areas.
- d. Provide appropriate PPE.
- e. Continue training staff in proper equipment use/maintenance.
- f. Continue to send Grounds Department to NMSU-CES/NMDA/USDA-NIFA/EPA-sponsored Pesticide Safety Education Program workshops. (See Attachment 11.1.)
- g. Utilize SafeSchools Training programs properly.

Maintenance Policies and Procedures

The district establishes safety policies and procedures that are distributed, practiced, enforced and reviewed as frequently as necessary, but at least every year.

- a. All safety related policies are reviewed and approved by the district leadership and forwarded to the school superintendent and board for final approval. All policies developed and adopted based on new regulatory standards will be identified to the district leadership.
- b. All product safety recalls are directed to the safety officer or designee for review and follow up as appropriate.
- c. Through a comprehensive inspection and maintenance program the grounds and all equipment are maintained in a manner intended to provide the highest level of safety for all staff and other people coming to the district facilities authorized to use devices.

Leadership Dec. 2023

Operations

-Inclement Weather

-decision will be made by 6:00 am; review the site with your custodians and determine the priority entrances paths for students and staff; 1st option is to hold school as normally scheduled; 2nd option is a 3-hour delay – review with staff and students the affect the delay would have on your schedule; 3rd option is a cancellation – review with custodial and office staff the requirements of the cancellations

-Media Cast – covers our district in relation to copyright laws; no need to purchase the individual licensing agreement with 3rd party vendors; check MediaCast prior to needing the video; if not present, forward the copy of the video to CAI for encoding; they will need 5 days prior to event for encoding prior to viewing; a requirement is that HMS owns the copy and we are archiving it digitally for use.

-Safe Schools Plan – will be updated beginning in January; will be chunked and will require your Campus SET to be involved in the process. These are due to Santa Fe by February 15, 2017

-Building Checks during break – send the schedule to Cami and Debbie; buildings are to be checked by 10 am and report any issues to Jeff to be addressed; doors are to be unbarred and only the front door will be accessible via card access

-[Review the Building shutdown procedures](#) from Mr. Strickland. Also have your custodians pop a few ceiling tiles every 50 feet or so in your hallways. This will allow the heat during the break to temper the overhead utilities and assist with pipe

-See email from Debbie Nichols referencing the acceptance of deliveries during the break.

-laptops being damaged in carts as well as staff machines – follow up with your lab managers to get a feel for how many laptops/machines are being damaged; Andrew can get you an update as well

-quotes for repair and replacement of equipment to be forwarded to principals

-accidental damage is covered; intentional damage is not covered; suggestions on how we recoup those costs currently draining resources that should be available to other students, staff and other purchases being requested

-Hand Held Radios to be delivered to CO Operations on Friday. The radios will be updated over the break and returned to your campus. You will receive labels to identify your radios to ensure you receive the same radios. We only need the radios; no chargers or clips. I will send you an email when your radios have been returned so that you may charge them prior to school starting on Jan. 9

-[Hand Held Radio chargers](#) – we continue to work with radio supplier and Motorola on the charging solution. We are discussing the use of multi-chargers for each campus. Click link for a pic of the charger.

-Website update – hobbsschools.net will look different at some point after the break. Your webmaster will be receiving additional training after the break as well to help with maintaining your campus website

-HVAC work orders- we currently are piloting 4 sites to streamline the service calls issued for heat or AC. After the break we plan to roll-out the updated process to all sites for implementation. If not a pilot school, continue to process work orders as you currently are

-SPAM / Phishing occurred in November; 1 in 5 HMS employees clicked on a SPAM email that requested they change their password and 80% of those employees entered data. Essentially opened the door to our house and gave the sender full control to take what they want and do with it what they want. Additional quick hits will be provided on a periodic basis to boost our awareness and bolster our security.

-[Safe Schools Training](#) – Custodians are assigned ongoing training each month; their training logs will be made available to their supervisor to determine what areas they have grown professionally.

-[Safe Schools SDS](#) – confirm with your custodians that the old SDS notebooks have been discarded of. The posters are to be displayed to grant access to materials being used on the campus. The link provided is HMS District poster. Your campus has a custom poster for your campus.

-[Questions or Concerns](#) – as always please reach out with questions, concerns or comments

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Service Contract and Vendor Oversight</p>	<p>Policy 12.0</p>
--	--	--------------------

POLICY

The Hobbs Municipal School District may need to utilize an outside service vendor(s) to accomplish and/or supplement maintenance tasks or projects outside the scope of the maintenance & custodial staff's qualifications. These include but are not limited to HVAC, Life Safety, Project Management (project, construction and architectural vendors).

CONTRACT / VENDOR EXPECTATIONS AND RESPONSIBILITIES

- Every maintenance contractor/vendor performing work for the Hobbs Municipal School District is expected to perform work in a professional manner and at the highest quality possible following the district's code of conduct policy.
- All contractors and vendors are informed as to the district's proper procedures, safety guidelines and Code of Conduct while on school property.
- The Hobbs Municipal School District and the maintenance contractor are partners working towards the common goal of repairing and or maintaining systems that support the business and educational process of the district.
- Maintenance contractors & vendors and their employees will act in a professional manner when working on any school site(s) and will avoid any direct contact or interaction with students.
- The maintenance contractor, their employees and subcontractors shall adhere to the district's tobacco-free policies.
- The contractor/vendor will not commence work until an approved purchase order has been obtained per district guidelines. Guidelines include proper quotes and proposals associated with invoice & warranty information and proper district-approved purchase orders, prior to rendering payment for services.

CONTRACT/VENDOR SERVICE EXPECTATIONS

- Maintenance contractors and vendors are expected to review and understand the scope of work in order to appropriately quote the job.
- It is the responsibility of the contractors and vendors to request any additional information needed to clarify the scope of work.
- Maintenance contractors and vendors shall provide accurate and detailed cost proposals, in a timely manner, including details of specific work not included in the proposal.
 - Proposals shall include an estimated timeframe (hours, number of technicians, overtime etc.) for completing work.
 - Cost for materials to include delivery as applicable.
 - Appropriate New Mexico Gross Receipts Tax.
- Maintenance contractors and vendors shall be licensed contractors in the State of New Mexico relevant to the work being performed.
- All contractors and vendors shall include their contractor licensure number on all proposals and provide current proof of liability insurance.

- Maintenance contractors and vendors shall follow all applicable building codes related to the work being performed.
- All contractors and vendors are expected to obtain appropriate building permits to complete work as required by NM State Law.
- Maintenance contractors and vendors shall perform clean up related to contract services in order to complete the work performed.
- Maintenance or repairs shall be accomplished in a manner and time schedule that minimizes discomfort to the buildings occupants or potential damage to the building or systems
- The service contractor is responsible for ensuring utilities are restored to equipment shut down for maintenance, service or repair upon completion of services and that equipment is in normal operating condition.
- A final report including invoice & warranty information associated to a district approved purchase order will be provided to facility/district prior to payment for services rendered.

DISTRICT STAFF RESPONSIBILITIES

- The Hobbs Municipal School District will provide clear, concise “Scope of Work” for any work requested.
- The Hobbs Municipal School District will provide oversight of work performed including final inspection.
- The Hobbs Municipal School District will coordinate work as needed with the school site.
- The Hobbs Municipal School District will provide final approval of work completed.

ACCESS CONTROL AT SCHOOL WORK SITE

- Maintenance contractors and vendors shall sign-in at the appropriate school site. The sign-in log will be maintained at the front desk of every Hobbs Municipal School District site.
- All district loaned equipment to include keys, access cards, and badges shall be returned at the end of the Scope of Work.

SAFETY POLICIES

- Maintenance contractors are fully responsible for the safety of all workers performing Scope of Work services for the company and will be fully responsible for following all applicable safety regulations outlined by the Occupational Safety and Health Administration (OSHA) and state building codes to include Lock Out/Tag Out procedures.
- Maintenance contractors and vendors shall utilize appropriate personal protective (PPE) equipment related to work being performed and shall require anyone entering the work zone(s) to also wear appropriate PPE.
- Maintenance contractors and vendors shall provide appropriate signage necessary to warn others of work being performed that may cause injuries to others.

References:

PSFA:
NM State Statute

Original Date	MM/YY
Review/Revision Date	MM/YY
<input type="checkbox"/> Supersedes all Previous	
Approved: _____	Date ___/___/___

- Maintenance contractors and vendors are responsible for the safety of students and school district employees when working at any school site.
- Maintenance contractors and vendors shall provide any necessary temporary safety devices to separate the work being performed from the students and school district employees.

FREQUENCY AND METHODS OF COMMUNICATIONS WITH DISTRICT PERSONNEL

- The Hobbs Municipal School District facilities department or designee shall designate a person who will act as the job manager for each contracted maintenance job.
- All communication with the contactor shall take place through the assigned job manager or designee.
- Communication will occur as frequently as necessary and no less than weekly for long term projects and daily on all short term projects and work lasting less than one day.

DOCUMENTATION OF WORK UPON COMPLETION

- Contractor/vendor will be responsible to train district staff on operation and care of equipment as applicable.
- Contractors and vendors will provide operational manuals for installed equipment.
- Superintendent, Maintenance Supervisor or Designee will have final signature approval on any work completed by contractor prior to contractor/vendor leaving the site. This includes a visual review of the completed scope of work to ensure equipment is placed back in its proper operation condition.
- Contractors and vendors will provide training on newly-installed equipment operation to appropriate maintenance staff as necessary.

WARRANTY

- Contractors/vendors shall provide all warranty information to appropriate staff, including principals and superintendents on all work performed.
- If replacement parts carry a longer warranty, the contractor shall provide a copy of the warranty information to district representatives.

FIMS DOCUMENTATION

- All contract vendor work completed at district sites shall be documented in the FIMS/ SchoolDude work order system for appropriate tracking to include labor, materials and contract information with appropriate reference to district approvals and purchase orders.

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Facility Master Plan</p>	<p>Policy 13.0</p>
--	-----------------------------	--------------------

PURPOSE

New Mexico state law requires all school districts to have a current five-year facilities master plan as a prerequisite for eligibility to receive state capital outlay assistance (Section 22-24-5 NMSA 1978). The Facility Master Plan provides the district with a road map on how to address their facilities needs in order to best utilize their resources and the necessary funding and timetables for completing necessary projects. The FMP identifies the necessary projects needed to provide their students with a healthy learning environment. In addition, districts need to secure the approval of the director of the Public School Facilities Authority (PSFA) prior to the construction or letting of contracts for construction of any school facility or related school structure requiring a building permit (Senate Bill 450, 2006).

POLICY

The Hobbs Municipal School District preventive maintenance plan shall be incorporated into the district's Facility Master Plan (FMP). The district's capital funding strategy includes major planned maintenance and repair projects. Districts shall develop both a comprehensive Facility Master Plan and a Preventive Maintenance Plan in order to be eligible for a capital outlay award.

PROCEDURE

1. The maintenance supervisor will maintain a detailed and prioritized list of capital replacement items and system components related to the facilities.
2. On a monthly/quarterly basis, the maintenance supervisor will submit a report of repair items exceeding the routine expenditure cap for repair and determine a capital cost for replacement.
3. This capital list will be reviewed, assigned a priority, approved, and integrated into the Facility Master Plan.

Methods of determining capital projects:

There are 2 recommended methods of determining projects as follows:

1. FIMS method
2. Physical Building Audits and data collection

Hobbs Municipal Schools CIP by Top 5 Priorities

Priority	Project No	School	Project	Description	TPC
1	172.7	B.T. WASHINGTON ELEMENTARY	Media Center and media center addition	New kindergarten and media center addition	\$2,761,323

 HOBBS MUNICIPAL SCHOOLS	Facility Safety Assessments	Policy 14.0
---	-----------------------------	-------------

POLICY

The Hobbs Municipal School District shall develop a program to conduct environmental safety tours/rounds at all school locations to proactively identify environmental deficiencies, safety hazards, and unsafe practices.

PROCEDURE

1. The Quality of Education Survey (which includes questions pertaining to safety and security) is placed online annually. This data is used to make recommendations for improvement for safety and security.
2. A District Safety Committee Meeting is held by Director of Operations the fourth Tuesday of every month. A representative from each facility makes up the committee.
3. Deficiencies are documented and work orders added to the Facility Information Management Systems (SchoolDude) for processing, using the defined priorities definitions.
4. Safety work orders are prioritized to prevent further risks to students, staff or guests.

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Maintaining Equipment Records</p>	<p>Policy 15.0</p>
--	--------------------------------------	--------------------

PURPOSE

Equipment records are a vital component in the development of and the continued operation of the district’s preventive maintenance program. Developing and maintaining accurate records informs maintenance personnel of the equipment within their facilities, what areas they serve and the required preventive maintenance tasks necessary to maintain them in a reliable and quality manner. In addition, it informs them of the importance of the attached individual components that may need maintenance and developing strategies for replacement parts and preventive maintenance tasks.

It can also provide data that may lead to the detection of significant trends; for example, if a number of items in the same building suffer similar electrical problems, there may be an associated problem with the building electrical distribution system.

Accurate Equipment records are necessary to begin any preventive maintenance program and should be updated regularly but no less than annually.

Accurate equipment records simplify making cost benefit analysis of maintenance activities. Through effective record keeping on equipment preventive maintenance tasks the districts can determine costs on preventive maintenance, equipment parts and the useful life replacement time periods and effectively budget for replacement through the capital process as needed.

POLICY

It is the policy of the Hobbs Municipal School District that all facility equipment (HVAC, Playground equipment, life safety systems, etc.) that is to be maintained by the district’s personnel or their designees will be re-inventoried and documented in the Facility Information Management System on an annual basis or as equipment is replaced or added to the facilities resulting from projects and/or emergency replacements. This process should include documenting equipment specifications to include, but not limited to, the following items: make, model, serial numbers, warranties, service contracts, recommended preventive maintenance tasks, spare parts needed to maintain the equipment, initial and replacement cost projections. The FIMS administrator and the facilities director/manager are responsible for executing this policy.

PROCEDURE:

The following is a procedure for updating records and replacement of equipment utilizing the FIMS / SchoolDude data base.

Procedures for updating records and replacement of equipment:

When an equipment item is installed or replaced it should be documented in the district's FIMS account. This can occur in either the Maintenance Direct (MD) or Preventative Maintenance Direct (PMD) modules of the *SchoolDude* software. The specifics of the new piece of equipment should be entered and the records of any removed items should be documented as "*removed from service*". A basic outline of record keeping policy is as follows:

- The equipment manufacturer's O&M Manuals should be obtained and filed by the district rep and provided to the FIMS Administrator for data entry
- An equipment number is assigned in FIMS using the following format:
 - Description-Location-integer
 - PSSS-EPES-007 translates to:
 - PSSS = Play Structure Swing Set
 - EPES = Eastern Plains Elementary School
 - 007 = Unit number 7

If an equipment item is replaced with the same type, the same number can be re-used but the letter "R" which stands for Replacement should be added to the end of the Equipment Record number (PSSS-EPES-007-R) in the FIMS system.

For added equipment, the same description and location code should be used, but the number should be changed with no two numbers alike for the same type and location of equipment. Each equipment number must be unique.

- Enter as much information in FIMS about the installed item as possible; i.e., location, model and serial number, installation date, warranty information, life expectancy, etc. When available and as applicable, replacement part details can be added, such as filter and belt sizes, etc.
- Written manufacturer's information about the equipment should be filed
- Existing PM schedules can continue to be used for replaced equipment of the same type, but new PM schedules should be developed for new types of equipment.
- PM Schedules should be developed and activated for the new equipment
- Replaced equipment should be removed from service in the FIMS Equipment Record, and any PM Schedules deactivated. In the equipment records of MD or PMD follow this outline to deactivate equipment:
 - Click On Equipment under Information and Analysis
 - Find Equipment record to be deactivated
 - In the Add/Update Page for that equipment record type a date in the Date removed box.
- Failed equipment should be disposed of properly in accordance to school policy.

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Reports – Maintenance Metrics, FIMS Proficiency</p>	<p>Policy 16.0</p>
--	---	--------------------

PURPOSE

Monthly and quarterly reports, both in narrative and quantifiable data forms, are an integral part of business communication and assist developing departments, superintendents and boards with improved decisions making of processes that ultimately benefit the districts quality. As a good business practice, Superintendents and Boards should use the information to improve their knowledge of the districts school sites physical conditions, capital needs and overall activities and accomplishments towards the annual report.

POLICY

It is the policy of the Hobbs Municipal School District to create monthly reports based on data collected in the Facility Information Management System/SchoolDude and present it to the Superintendent and Board for review. Monthly reports from the maintenance and operations department are to be developed and submitted to the Superintendent and Board no more than 10 days into the following month.

At the end of every month the Hobbs Municipal School District Director of Maintenance or designee shall develop a report that encompasses the maintenance and operations activities occurring during that time frame for administrative review (See Maintenance Metrics report).

PROCEDURE:

The Maintenance and Operations Report shall include:

1. Any changes to the district preventive maintenance plan
2. Maintenance Metrics activities to include:
 - Work Order Completion rate
 - Monthly Work Order Back Log %
 - Work Order Transaction Information
 - Monthly Preventive Maintenance Work Order rate
 - Monthly PM cost ratio
 - Vandalism report
 - Utility Direct Management 12 months of effective history
3. Progression of developed maintenance goals for the year.
4. Progression or accomplishments of developed district capital projects and updates to the 5 Year Facility Master Plan.
5. Results of environmental or safety rounds and any corrections made.
6. Custodial performance activities occurring at the district sites.
7. Meetings and training activities occurring in Maintenance and Operations

 HOBBS MUNICIPAL SCHOOLS	Reports	Policy 16.0
--	----------------	-------------

8. Staffing changes or challenges effecting the completion of the preventive maintenance activities.
9. Additions/deletions or changes to any maintenance and operations policies.
10. Additions/deletions of major equipment at district facilities.
11. Any regulatory (local, state or federal) compliance visits/audits, listing all variances and a plan of correction to those variances.
12. Changes or updates to the districts energy management programs.
13. Hazardous Materials & Waste Management activities to include additions/deletions to the district's MSDS program and any training activities.
14. Pest Control Management Activities to include additions/deletions to the district's IPM program and any training activities.
15. Fleet Vehicle maintenance activities, repairs etc.

Please print and attach the district M3 Report in this section for district reference.

 HOBBS MUNICIPAL SCHOOLS	Energy Management Plan	Policy 17.0
---	------------------------	-------------

POLICY

It is the policy of the Hobbs Municipal Schools to ensure that every effort is made to conserve energy and natural resources while exercising sound financial management.

PROCEDURE

The implementation of this policy is the joint responsibility of the board members, administrators, teachers, students and support personnel; and its success is based on cooperation at all levels. The district will maintain accurate records of energy consumption and costs of energy and will provide information to the local media on the goals and progress of the energy conservation program. The principal will be accountable for energy management on his/her campus with energy audits being conducted and conservation program outlines being updated. Judicious use of the various energy systems of each campus will be the joint responsibility of the principal and head custodian to ensure that an efficient energy posture is maintained on a daily basis. To ensure the overall success of the energy management program, the following specific areas of emphasis will be adopted:

1. All district personnel will be expected to contribute to energy efficiently in our district. Every person will be expected to be an “energy saver” as well as an “energy consumer.”
2. Energy management on his/her campus will be made a part of the principal’s annual evaluation.
3. Administrative Energy Guidelines have been adopted, that are the “rules of the game” in our energy program. Further, to maintain a safer and healthier learning environment and to complement the energy management program, the district has developed and implemented a preventive maintenance and monitoring plan for its facilities and systems, including HVAC, building envelope, and moisture management.

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Grounds-Keeping Maintenance Plan</p>	<p>Policy 19.0</p>
--	---	--------------------

DEFINITIONS:

Grounds-keeping is the activity of tending an area of land for aesthetic or functional purposes; typically, in an institutional setting. It includes mowing grass, trimming hedges, pulling weeds, planting flowers, etc.

Groundskeeper is a person who maintains landscaping, gardens or sporting venues (and their vegetation where appropriate) for appearance and functionality.

PURPOSE

The purpose of the Grounds-keeping Preventive Maintenance Program is to create a method for the development and implementation of a grounds maintenance program for the schools to provide an aesthetically appealing and safe environment.

POLICY

Each year the district Grounds Department develops landscape maintenance work plans for the following year. Work plans are developed for the following maintenance specialties:

- General Grounds
- Turf Maintenance
- Xeriscape Maintenance
- Mowing and Hardscape Maintenance
- Irrigation Maintenance
- Tree and Shrub Maintenance

The work plans identify the types of work that need to be completed each week to achieve the standards service level goals for the area(s) determined by the district administration. Adjustments to the work plan are made each year to reflect changes staffing levels, district square footage, changes in the landscape nomenclature, or adjustment in water use etc.

The work plan serves as a guideline to the technical and supervisory staff. Weather and other factors impact the application of the work plan, however overall they provide an accurate depiction of the landscape maintenance being done at the district school sites.

Attachment:

 <p style="text-align: center;">HOBBS MUNICIPAL SCHOOLS</p>	<p>Use of Pesticides on School Property Integrated Pest Management (IPM)</p>	<p>Policy 20.0</p>
--	--	--------------------

Use of Pesticides on School Property

POLICY

The Hobbs Municipal School District will develop procedures for the implementation of pest management processes with consideration for reducing the possible impact of pesticide use on human health and environment, including people with special sensitivity to pesticides.

PROCEDURE

1. Custodian will be notified of the presence and specific location of pests (SBE 9.13.4c)
2. Custodian will notify principal
3. Principal will notify Maintenance Department
 - a. Work Order (non-emergency)
 - b. Phone call and Work Order (emergency)
4. Maintenance Department will schedule with vendor an exact time and date for application
 - a. Vendor must be able to apply on schedule as agreed
5. Maintenance will notify principal of application time and date
6. School will notify the necessary parents/guardians of the application date, time and pesticide/material to be applied (SBE 9.13.4e), via mailing and/or posted notification
7. The vendor will apply the pesticide in the specific location defined by the custodian
 - a. A custodian or school representative must be available to unlock and lock building and doors
8. At the time of each application:
 - a. Make a copy of your school/facility map
 - b. The applicator will mark the locations where chemical was applied
 - c. He and building representative will sign, date, and list the time of day on the copy of the map, to be kept in school notebook (SBE9.13.4f)

Use of pesticides will be governed by the following standards:

Definitions as used in this section:

Pesticides: is any substance used to kill pests. It includes insecticides, herbicides, fungicides, rodenticides, etc.

Pests: is any organism with characteristics that are regarded by humans as injurious or unwanted.

- a. No pesticide may be applied to the Hobbs Municipal School District property and no pest control device (as defined in the New Mexico Pesticide Control Act) may be used on the Hobbs Municipal School District property except those pesticides and devices currently registered for legal use in the state by the New Mexico Department of Agriculture.
- b. No pesticide may be applied to the Hobbs Municipal School District property except by those persons certified in the applicable category and currently licensed by the New Mexico Department of Agriculture or by employees under their direct supervision.

c. Pesticide will only be applied in or on the outside of school buildings when a pest is present and will not be applied on a regular or calendar basis unless it is to treat an infestation and is part of a pest management system being implemented to address a particular target pest. A pest is considered to be present when it is observed directly or can reasonably be expected to be present based on finding evidence such as droppings, body parts, or damage that is typically done by the pest. This section of the regulation does not apply to pre-construction termite treatments or the use of outdoor pesticides.

d. Pesticides that are applied in a liquid, aerosolized, or gaseous form through spraying, aerosol cans, bombs, fumigation, or injections into the ground, foundation, or plants will not be applied on the Hobbs Municipal School District property when students, staff or visitors are present or may reasonably be expected to be present within 6 hours of the application. In emergency cases where a pest infestation threatens the health and/or safety of the occupants of the Hobbs Municipal School District property and which requires the immediate application of a pesticide to remediate, students, staff, and other school occupants will be removed from the treatment area prior to the application. Small amounts of gel or liquid pesticides applied to cracks and crevices or baits used to treat pest infestation are exempt from this section.

e. At the beginning of each year, and when new students register, the Hobbs Municipal School District will develop a list of parents and guardians who wish to be notified prior to pesticide application during the school year. The parents/guardians will be notified in writing prior to pesticide application. General notification of anticipated pesticide applications will occur by posting or dissemination of notices or oral communications or other means of communication. In emergency cases where a pest infestation threatens the health and/or safety of the occupants of public school property no pre-notification is required. Immediately following the application of a pesticide in emergency cases, signs will be posted indicating an application was made.

f. Written records of pesticide applications will be kept for three (3) years at each school site and will be available upon request to parents, guardians, students, teachers, and staff.

PURPOSE

Sports Surfaces are a very important asset to our district and the safety of our athletes require a clean safe sport surface.

It is important that the people who are responsible for field maintenance are thoroughly familiar with its contents and refer to it regularly. The contents in this manual represent the most current information regarding suggested procedures for the proper use and care of synthetic turf systems.

POLICY

It is the policy of the Hobbs Municipal School District that all facility equipment (HVAC, Playground equipment, life safety systems, etc.) that is to be maintained by the districts personnel or their designees will be re-inventoried and documented in the Facility Information Management System on an annual basis or as equipment is replaced or added to the facilities resulting from projects and/or emergency replacements. This process should include documenting equipment specifications to include but not limited to the following items: make, model, serial numbers, warranties, service contracts, recommended preventive maintenance tasks, spare parts needed to maintain the equipment, initial and replacement cost projections. The FIMS administrator and the facilities director/manager are responsible for executing this policy.

PROCEDURE

The following is a procedure for maintaining the districts sports surfaces. It is good business to protect your investment and take care of your synthetic turf system. To do this most effectively, **KEEP IT CLEAN.**

The following maintenance precautions are advised:

- Control access to field
- Keep your surface free of litter, mud and debris
- Post signs prohibiting smoking and carrying food or drink onto the field
- Minimize and properly monitor the use of motorized vehicles on your surface
- Repair minor damage promptly
- Follow suggested maintenance and cleaning procedures

CLEANING AND STAIN REMOVAL

For outdoor surfaces, rain is the best cleanser. Rainfall gently cleans the fibers of dust, pollen and airborne pollutants in a way that is difficult to duplicate. In areas where rainfall is scarce – or during prolonged periods of drought – an occasional watering is beneficial to cleanse the synthetic surface. Listed below are the suggested precautionary maintenance practices:

- Keep trash and litter containers on site
- Route field's access traffic in such a way to minimize mud/dirt tracking on the field
- Set up drinks for athletes during practice breaks off the synthetic surface if possible
- Enforce a smoke free environment and discourage the use of chewing tobacco, gum and sunflower seeds

DAILY CARE

Daily care is on-going care, it does not necessarily mean care each and every day. The amount and frequency of daily care is dependent on not only the surface, but also by the volume and the type of use.

MFG. recommends that every turf system shall be periodically groomed and swept to remove litter and dust etc.

LITTER REMOVAL

Light trash (paper, peanut shells, sunflower seeds, athletic tape etc.) and airborne dust can be removed easily with a lawn sweeper or maintenance sweeper.

SWEEPERS

When using machines, several points should be observed:

Bristle Type

The sweeper should have synthetic fiber bristles such as nylon or polypropylene. The minimum brush length should be 2.5". The maximum bristle diameter should be .030". The brush must contain no metal or wire. Metal fibers can fall out and cause injuries to players and can also damage the surface.

Brush Setting

The brush setting should be monitored. The actual setting will of course depend on the model and type of sweeper. The sweeper will work best, however, when the brush is set so that it barely touches the tips of the fibers of the turf.

DO NOT SET THE BRUSH SO LOW THAT IT DIGS INTO THE TURF PILE OR BACKING.

Too low a setting can damage the turf. Vacuum cleaners are not recommended to remove mud. We will contact our Turf representative to answer any questions about the type of machine to use or brush settings.

Turf Loading Limitations

Brushing and brush cleaning may require several trips over the field to finish the operation. Any sweeper that weighs more than 300 lbs. should have turf type low ground pressure tires (pneumatic tires) with a maximum tire pressure of 35 pounds per square inch (psi). Do not park vehicles on the turf, especially in the heat of the day, or leave vehicles on wet turf for long periods of time.

Exhaust Fumes

For outdoor use we recommend either electric or propane. The type of fuel or power used by a sweeper is of no major importance for outdoor use. However, if the sweeper has an internal combustion engine, make certain that the hot engine exhaust is not discharged down toward the playing surface. Hot objects can damage the field and engine exhaust may soil it. Also check to make sure that the sweeper is designed in such a way that a hot muffler or exhaust pipe cannot drop onto the surface.

Oil Spillage, etc.

Care should be taken to prevent lubricating oil, gasoline, grease, transmission fluids, battery acid, brake fluid, etc., from dripping, leaking or spilling on the turf surface during sweepings. Such spills can discolor the turf and damage the fibers and turf backing. Proper maintenance procedures should be observed in this regard. Battery acid and other fluids should not be allowed on the surface. Never change or add fluids to maintenance equipment while on the surface.

CAUTION: Electrically powered units may not be properly grounded, do not use them on wet or damp surfaces.

Frequency

The removal of loose rubbish and surface dust should be performed on an as needed basis, generally about once a week depending on usage.

DO's

Synthetic turf systems are designed to resist both wear and exposure to the elements. The effectiveness of their materials, design and construction is demonstrated by the long life of fields under heavy use in many climates. The following are the most obvious precautions:

- Control access to the synthetic turf system. Keep the synthetic turf system and close adjacent areas clean and free of litter, mud and debris.
- Post signs prohibiting smoking and carrying food or drink onto the synthetic turf system.
- Observe load limits for static and rolling loads, especially when the surface is wet.
- Repair minor damage promptly.
- Follow suggested maintenance and cleaning procedures.
- Contact your turf representative for assistance with repairs, renovation work, or any further technical details.

DON'T's

DO NOT ABUSE THE SYNTHETIC TURF SYSTEM WITH:

- Vehicle traffic
- Heavy static loads
- Fireworks
- Storage of materials such as drums, lumber, equipment, etc.
- Golfing, shot putting, javelin or discus throwing
- Use of long spike track shoes
- Open flames, welding, etc.
- Use of wire brushes in any form
- Use of cleaning equipment, materials, and methods not authorized by Manufacturer
- High-pressure water sprays exceeding 500 PSI
- Vehicles with non-pneumatic tires
- Introduction of in-fills or impregnated layers other than supplied or authorized by MFG.
- Do not allow the use of bikes, skateboards, lawn mowers, etc.
- Do not allow any unauthorized use
- Improper storage of a Sports Turf removable synthetic turf system

GROOMING OF INFILLED TURF

MFG. recommends that every turf system has a routine brushing every 80 to 120 hours of usage. Routine brushing is accomplished with a commercial turf brush suitable for brushing the surface. If you do not have a commercial turf brush please contact your Turf representative to purchase one. In-filled surfaces do require grooming. Additional grooming may be necessary only when and if the infill has become displaced due to excessive use in certain areas of the surface such as a goal and heavy traffic areas.

ROUTINE BRUSHING

Routine brushing keeps the surface free from debris, but also maintains your synthetic turf system at its optimum performance. Routine brushing simultaneously achieves three objectives:

1. Keeps infill layer uniform in its distribution
2. Ensures that the exposed part of the fiber is uniform in its direction and stays erect
3. Helps remove litter, leaves, dirt, etc.

References:

PSFA:
NM State Statute

Original Date	MM/YY
Review/Revision Date	MM/YY
<input type="checkbox"/> Supersedes all Previous	
Approved: _____	Date ___/___/___

The realized benefits from routine brushing are:

1. Consistent footing and ball bounce throughout the surface
2. Maximum aesthetic appeal
3. Lengthened life expectancy

STAIN REMOVAL

General Instructions

Turf fibers are among the most stain resistant in the industry. Most stains are not “true” stains but rather residue of foreign matter that must be promptly and thoroughly removed. The first rule in spot removal is promptness. It is always easier to clean up a fresh spill than one that has dried and hardened. Remove any solid or paste-like deposit with a spatula or table knife. Blot up excess liquids with a thick stack of paper towels or a dry absorbent such as “kitty litter” or Fullers Earth. Dry absorbents can then be swept or vacuumed up. Turf surfaces provide good resistance to staining. However, it is important to realize they are only one part of a sophisticated system of various components designed for overall field performance. Some cleaning agents that are safe for the fiber can be harmful to other components of the system.

Nylon Fibers

Cleaning agents are grouped into two sets, one of which can be used in liberal amounts directly on the turf surface, and the second which should only be applied by rubbing a cloth soaked in cleaner, in order to minimize penetration of possibly harmful agents below the turf fibers. In the first group of cleaners, which generally can be applied to non in-filled systems without any special precautions, are the following:

1. A warm, mild solution of granular household detergent such as Tide or ALL in water, or any neutral low-sudsing detergent that is recommended for fine fabrics. Use approximately one teaspoon of detergent to one pint of water. This will handle most stains.
2. Use three percent solution of ammonia in water for more severe cleaning problems. (NOTE: household ammonia is three percent. Industrial aqua ammonia is 33 percent. Dilute nine parts water to one part industrial ammonia, or the available supply as appropriate.) Thoroughly flush the surface, rinse with plenty of cold water afterwards.
3. Clean, dry absorbents such as paper towels or commercial “kitty litter” can be used for applicable stains. In the second group of cleaners, where agents must be applied sparingly, care must be taken to avoid penetration beneath the turf fibers. We recommend consulting a professional for application instructions.

Polypropylene & Polyethylene Fibers

Polypropylene & polyethylene fibers are among the most stain resistant fibers known to man. Hence, most “stains” ON polypropylene and polyethylene fields are not true stains but rather residues of foreign matter which must be promptly and thoroughly removed. (This is not the case with nylon and other fibers on the market.) Most “stains” on polypropylene or polyethylene fields can be removed with water or soap and water. The first rule is promptness. It is much easier to clean up a fresh oil spill before it has time to dry and harden. Remove any solid or paste-like deposit promptly using a dull knife or spatula-like tool. Blot up excess liquids with a stack of towels, cloth or paper. Dry absorbent clay based materials, such as cat litter absorbers (“kitty litter”) can be very useful and should be stored on site. Such dry absorbers can be swept or vacuumed up. Cleaning agents are grouped into two sets, one of which can be used in liberal amounts directly on the turf surface, and the second of which should only be applied by rubbing a cloth soaked in the cleaner, in order to minimize penetration of possibly harmful agents below the turf fibers. The first group of cleaners can generally be applied to infilled systems without any special precautions.

“Water Borne” Residues

Most “stains” commonly associated with polypropylene and polyethylene playing fields can be classified as “water borne” stains. These stains are best removed using a warm mild solution of granular household detergent (non-abrasive) and water.

1. Brush the residue with a stiff brush
2. Scrub the area with soap and water
3. Rinse the area thoroughly with clear water to remove all traces of soap
4. Dry with absorbent towel(s), if necessary

A. three percent solution of ammonia in water may be used in lieu of household detergent for more stubborn residues or stains.

“Non-water Borne” Residues

In the second group of cleaners, where agents must be applied sparingly, care must be taken to avoid penetration into the turf fibers. We recommend consulting a professional for application instructions.

FIELD-MARKING, LOGOS, ADVERTISING AND DECORATION PAINTED LINE AND MARKING SYSTEM

NOTE: Inlaid line and marking systems are preferred for optimum performance. Inlaid line and marking systems are constructed utilizing the same material specifications, and are to be inset in such a manner to ensure a good bond, an even finished surface and physical strength equal to the material prior to introduction of the line and marking system. Permanent inlaid line and marking systems are more attractive than painted systems because of the reduction in maintenance and quality of image. Alternative painting of line and marking systems and their care is explained below. Many facility owners like to use elaborate line and marking systems, including facility logos, league logos, sponsor logos, mid-field and end-zone design in assorted colors. Others prefer the simpler approach of sharp, well-defined game markings with no extraneous markings. In either instance, the materials and techniques used in applying paints will determine the life of the markings and the ease of removal when these need to be changed. In marking, do not apply paint too heavily. Light applications give good visibility and adequate life and are less abrasive than excessive layers of “caked-on” paint. Also, where possible, do not paint over inlaid lines and logos.

Dry Markings

Chalk markings are NOT recommended for in-filled systems. Dry chalk can be captured by the infill which can degrade a field’s performance and drainage. There are some aerosol chalks that have proven to work well on synthetic turf. Some brands can stain inlaid lines and logos. We recommend Pioneer’s Aerosol chalk as it fades to white over time and will not stain turf.

Paints

Regardless of the type of paint used and design required, best results will be obtained when paint is applied to a clean, dry, dust and grease free base. It is extremely important that old, degraded paint and dirt be washed off any area that is to be repainted if the best appearance and traffic resistance are to be obtained. If your field needs this type of attention, we recommend contacting a Pioneer Athletics representative for quotations and scheduling at.

Temporary Paint

The recommended paints in this category are designed to be easily removable after usage in a limited number of sport games on in-filled systems. Usually, the removal can be achieved by applying a special paint remover solution, agitating with a deck brush or remover machine and rinsing thoroughly with water. We suggest a top quality water based paint designed specifically for synthetic turf such as Pioneer

Athletics Game Line paints. One day curing of these paints, at moderate temperature and dry weather, is sufficient. Traditional grass paints or household paints can be very difficult to remove.

Durable Paints

High quality latex based permanent paint is highly durable. Once applied and cured, this paint may require special chemicals and equipment to remove. Thus it is imperative that use of this paint be restricted to carefully chosen areas. For each of the above paints, it is recommended that 24-48 hours be allowed for complete cure. Paint should always be applied to dry turf at moderate temperatures. We recommend Pioneer Athletics' Extreme Line paints for in-filled systems and Titan for non-in-filled systems.

Striping and Painting

The application procedure for applying temporary and permanent paint is as follows:

Remove excess paint existing on field. Test application procedure before going on the field (use a scrap of turf fastened to asphalt, plywood or use a corner of the field.) Use no more paint than absolutely necessary. Keep water on hand and readily available to rinse any spills or mistakes before they dry. The paint should be applied lightly to the tips of the turf fibers—not the entire length of every fiber. Applying the paint too heavily makes for a very rough, abrasive surface and will make the removal job very difficult. An airless system is recommended as it provides a superior look while using less paint. We recommend applying paint at 500-1,000 psi using a 317 or smaller tip. Sprayers that do not atomize the paint are not recommended as paint will flow into the infill and negatively impact removal and field performance. When applying paint, use large templates and cardboard or wood windshields to minimize paint over-spray. For logos and other markings, always use a guide such as templates or straight edges. Applying more than one coat of paint may make removal significantly more difficult. Therefore, we recommend a single coat be used where possible. Painting Turf systems with brushes or rollers is not recommended. Spraying equipment is recommended for the following four reasons:

1. Spraying can make a more uniform paint application
2. A more intricate template can be used if the paint is sprayed
3. Paint can be applied more rapidly with spray techniques
4. Paint can be removed more easily from areas that have been correctly sprayed than from areas on which the paint has been rolled

PAINT REMOVAL

The main key to efficient removal of temporary paint from surfaces is initial control in the application. The use of excessive amounts of paints is wasteful, presents abrasion hazards to players and requires extra work in removal. Either of the following two techniques should result in clean removal of temporary paints within reasonable time and without excessive labor.

Equipment needed for Paint Removal:

Use a street broom, deck brush, small sprayer or watering can, water hose, medium-sized tank or bucket for mixing, and a couple of wet vacuums.

Materials Needed:

Paint removal method requires the use of 8 percent ammonia. The solution should be prepared in advance and access to water outlets provided. The percent ammonia solution is prepared from aqua ammonia (33 percent ammonia) by diluting with three parts water to one part aqua ammonia.

CAUTION: Aqua ammonia is a strong chemical. Follow the seller's instruction for handling – including eye protection, avoiding skin contact, etc. Ammonia is very corrosive to copper alloys do not use brass nozzles or fittings. For mixing, use galvanized watering cans and a sprayer tank at all times.

Procedures

PSFA:
NM State Statute

Original Date	MM/YY
Review/Revision Date	MM/YY
<input type="checkbox"/> Supersedes all Previous	
Approved: _____	Date ___/___/___

1. Hose down the painted area with water until the surface is saturated. Using a sprayer or a watering can, apply the ammonia solution on the painted area. It is important that the ammonia solution be metered out uniformly at the rate of one gallon per 45 to 50 square feet. Scrub the wet area with a street broom until the ammonia solution turns to foam. A sweeping motion similar to sweeping a floor is sufficient. During this step, the paint will start to loosen and the pigment will begin to run. However, do not shorten the sweeping at this point.
2. Wait about 10 minutes to allow the foamed ammonia to work. Apply the same amount of ammonia solution on the area a second time. Thoroughly scrub the area with a street broom. This scrubbing is not intended to be a light scrub, scrub vigorously.
3. Hose down the area with water and simultaneously pick up the water and dislodged paint residue with the wet vacuum. Do not let the water and paint residue seep across the field. If the residue and water start to spread, stop the hosing and let the wet vacuum catch up. Repeat the process if necessary. However, if the paint was applied lightly and uniformly, repeating the process should not be necessary.

If the paint stubbornly adheres to the turf, take the following additional steps:

1. Repeat steps as above. Blast or fracture the paint loose with hot water from an industrial high pressure hot water sprayer. Set the water temperature at 150 degrees F (65C). Do not spray the water at “point blank” range – keep the wand at least 12 - 15 inches (30 - 40cm) from the turf. Use 10 gallons of hot water per minute and a water pressure of no more than 300 psi (21 kg/cm²). No solvent is required.
2. Wet vacuum the residue and water or immediately flood the field.
3. Rinse the area thoroughly with lots of water and pick up rinse water rapidly to avoid unsightly spots or paint residue.

LOAD LIMITS

As a general rule, no long term static load of more than 3 PSI (300 lbs./sq. ft.), nor any transient rolling load of more than 35 PSI be applied to any surface (foam pad or elastic layer under pad). Rolling loads of up to 30 psi are acceptable on an occasional basis. (The loading of a pneumatic-tired vehicle is approximately equal to the air pressure in its tires.) It is good practice to eliminate any unnecessary long-term static loads. Sheets of 3/4” exterior plywood or pieces of 2” x 10” lumber may be used to spread major static loads and thus minimize the risk of damage to the turf system.

NOTE: Under static loads, the surface should first be covered with a load spreader such as polyethylene sheeting to keep it clean. New plywood may contain materials that will leach out and stain the turf if it is exposed to water therefore a polypropylene barrier should be used under the plywood to prevent this from happening.

SNOW AND ICE MANAGEMENT

Snow and ice are not harmful to synthetic turf systems and can generally be left to melt and run off on their own accord. Sometimes, however, it becomes essential to clear away snow and ice to permit scheduled use of the surface. When this happens, the working principle for snow is to leave it in place until as near to time of use as possible. Doing so will minimize the risk of ice build-up from cold wind blowing across a damp snow-cleared surface. Ice removal is more difficult, especially if a heavy layer has built up following freezing rains (see below). Two methods are used for snow removal:

Snow B lowers

If the snow is dry and powdery, it can be swept or blown from the field using a rotary brush or snow blower. Be sure that any machinery used is set so as not to dig into the turf or gouge the surface.

If using a blower:

References:

PSFA:
NM State Statute

Original Date	MM/YY
Review/Revision Date	MM/YY
<input type="checkbox"/> Supersedes all Previous	
Approved: _____	Date ___/___/___

1. The first pass of the blower should be down the center of the field.
2. Second pass should be made at the edge of either side of the first pass and the blower must be adjusted so that the snow is deposited in the truck.
3. The blower then continues down one side and up the other accompanied by the truck.
4. Clean off remaining snow with a mechanical broom.

Snow Plows

Snow that is wet and sticky may be more easily pushed off the field by using a snow blade with a 4” to 6” wide rubber tip mounted on a Jeep or light tractor. If such a blade is used, extreme care should be taken to avoid digging into the surface. The best blade setting is one that barely “kisses” the top of the surface and rolls the snow ahead of the blade. In this procedure, the snow itself will maintain contact with the surface. Wood, metal or other rigid surface blades should not be used. Adjust the blade to proper height taking care that it will not gouge or dig into the surface. MFG. recommends wheels on each side of the blade to ensure the blade cannot possibly dig into the surface.

If using a plow:

1. Push snow into piles off playing surface.
2. Scoop into truck using front-end-loader., also with rubber tipped blade. Use extreme caution.
3. Use a rotary mechanical broom to clean off the remaining snow.

Severe cases of ice can be removed by using a small lawn roller to break up the ice and then proceed as above. It is recommended that all of the equipment used as described above be moved on pneumatic tires. LUGS, STUDS AND CHAINS ARE DAMAGING AND SHOULD NOT BE USED. Snow removal equipment may be stopped momentarily on the surface, but DO NOT PARK SUCH EQUIPMENT ON THE FIELD OVERNIGHT OR FOR SEVERAL HOURS. Tire pressure should be below 35 PSI. IMPORTANT: Keep tarps or field covers off the field in freezing weather. They are difficult to remove when frozen to the surface. Avoid using a tarp on the field during freezing weather. Tarps can freeze to the turf by means of condensation and thus can be very difficult to remove for a scheduled event.

WATERING OUTDOOR SYNTHETIC TURF SYSTEMS

Some owners have found it desirable to deliberately wet their synthetic turf surfaces, especially in periods of very hot weather. Wetting the surface provides moisture for cooling the field before evaporation takes place. It also acts as a lubricant to the turf but it must be noted it may also lower traction to a slight degree. On a hot sunny day outdoor playing surfaces can receive enough radiant energy to evaporate about a quart of water per square yard per hour. As the moisture evaporates the temperature of the synthetic turf will match that of natural grass in the same area. A full sized soccer, hockey or football field may evaporate up to 1200 gallons of water per hour in extremely hot weather. If you decide to water your field, be careful to distribute the water evenly. If water is put on the field, it should not be from a polluted supply. Also be aware, when a field is watered on an extremely hot day, you risk dangerously raising the heat index level which can be harmful to athletes.

SPECIAL EVENTS ON NON-REMOVABLE SYNTHETIC TURF SYSTEMS

Assemblies and convocation facilities with synthetic surfaces are often used for graduation ceremonies at many colleges / universities. The basic precaution is to keep long-term static loads below 300 pounds per square foot by the use of plywood or other load spreaders. Normally, 4’ x 8’ sheets of 3/4 “ plywood do a good job of load spreading, provided the load is not applied too near the edges of each panel. Landscape fabric should be laid over the turf under the load spreaders to avoid staining or spoilage of the turf. Any chairs placed directly on the playing field surface should be inspected to be sure that the tips of the legs couldn’t damage the turf. Metal chair legs should be protected with rubber tips. The legs of wooden chairs should be free of any sharp edges that may tear the turf or damage the under pad.

MINOR REPAIRS TO TURF SURFACES

Your playing surface has been carefully engineered to provide many years of service. In the case of vandalism or unusual abuse, limit your maintenance staff to performing minor repair. For more serious problems, consult your representative.

When to Repair

To properly maintain a synthetic playing field, be aware of day-today activities, usage and condition of the facility. It is very important that any minor damage be repaired immediately because a small problem may eventually grow into a major repair. In addition to routine awareness of field conditions, once or twice a year, each field should be given a careful and thorough inspection, preferably in the spring with a follow-up in early fall. All seams should be inspected and any loose areas noted and repaired. Go over the body of each panel of fabric and note any rips and/or tears. Assess the status of the under padding and the condition of the surface. In the case of an older and/ or heavily used field, inspections should be made more frequently.

Why a Spring Inspection?

Fields endure their heaviest scheduled activity during the fall months. Once your inspection has been completed you may require the assistance of a professional Turf crew. Your Turf Representative is always available to assist in the case of an emergency, but planned visits permit more efficient and cost effective service. If repairs are required they are easier to make in warm, dry weather. Adhesives will hold better and cure faster when there is more opportunity to leave the repaired area undisturbed. Gluing repairs should not be attempted if the field is wet. What Are "Minor Repairs?" An open spot in a sewn or glued seam, where the loose area in the seam extends from a few inches to one or two feet (along a glued seam line where at least one of the turf edges is still attached to the seam tape). Cuts, rips or tears in the surface fabric that are less than six inches or so in length do not generally require a special trip by our service staff and can be repaired by the owner without much effort. These can also be regarded as minor unless allowed to become larger. All of these problems can be handled by sewing or adhering the repairs. To repair minor seam openings or loose seam areas:

1. For in-filled systems, vacuum sand or rubber from the turf to be repaired.
2. Be sure that the fabrics to be adhered are dry, free from loose sand, dirt, old adhesive and other foreign matter.
3. Remove the area of debris.
4. Position the fabric to check for satisfactory final placement.
5. Be sure the seaming tape to which the fabric will be adhered is itself adhered to the underlying pad (If system uses an underlying pad).
6. Apply a small amount of caulk onto seaming tape. Avoid excessive adhesive to reduce the possibility of bleed through or bleed out. Spread the adhesive with a trowel and trowel so that the entire fabric is coated lightly and evenly.
7. Press the fabric into the adhesive bed uniformly.
8. Weight down the area and allow to cure for a minimum of 2 hours.
9. For in-filled systems, spread appropriate rubber or sand on the repaired area and brush into the turf thoroughly until even with surrounding playing areas.

SMOKING SHOULD BE STRICTLY PROHIBITED IN THIS AREA!

OTHER TYPICAL REPAIRS CIGARETTE / FIREWORK BURNS

Use a hand held metal brush (such as is used to remove paint) and brush the spot vigorously to separate the fibers. If brushing the turf does not remove the damage, take a razor knife and cut the fused area away.

PROHIBITED ACTIVITIES ON A SYNTHETIC TURF SYSTEM:

- Storage of materials such as drums, lumber, equipment, etc.
- Unnecessary vehicle traffic
- Shot putting, javelin or discus throwing, and the use of any metal spiked shoe
- Open flame, fireworks, welding, etc.
- Use of wire brushes in any form
- Use of cleaning equipment, methods or materials not authorized
- High-pressure water sprays exceeding 1000 psi
- Vehicles with non-pneumatic tires
- Introduction of in-fills that varies from the Turf specifications

 <p>HOBBS MUNICIPAL SCHOOLS</p>	<p>Snow Removal Plan</p>	<p>Policy 22.0</p>
--	--------------------------	--------------------

Table of Contents

POLICY STATEMENT

SECTION 1: PLAN/PROCEDURES

SECTION 2: CAMPUS SAFETY & CONTACT INFORMATION

SECTION 3: PRE-SEASON PREPARATION CHECKLIST

SECTION 4: WINTER PROCEDURES CHECKLIST

SECTION 5: SNOW RESPONSE STAFF WINTER PROCEDURES CHECKLIST

SECTION 6: EQUIPMENT/SUPPLIES INVENTORY

SECTION 7: RECORD-KEEPING & DOCUMENTATION

SECTION 8: TRAINING & SAFETY

SECTION 9: SNOW-REMOVAL PLAN

SECTION 10: POST-SEASON WORK

SECTION 11: INCLEMENT WEATHER POLICY

POLICY STATEMENT

The purpose of this document is to provide information on the procedures that the Hobbs Municipal School District will follow to respond to a snow event. It is the Maintenance Department's charge to provide safe access to, and egress from, the Hobbs Municipal Schools in the safest, most efficient and environmentally-responsible manner possible.

SECTION 1: PLAN/PROCEDURES

During winter months the parking lots, roadways and sidewalk areas are inspected on a continual basis by maintenance and custodial staff. The Director of Maintenance or designee makes contact with the grounds, maintenance and custodial staff to clear snow or salt icy areas. When snow and/or ice removal is required the staff take action to provide a safe environment.

The Hobbs Municipal School District will make every effort to ensure that all campus roads remain passable for emergency vehicles throughout the snow removal period. The district realizes the situation calls for continuous assessment of the snow conditions and monitoring of weather conditions. If campus closure or restrictions are needed, the decision is made by the superintendent and his/her team.

Priorities - Snow will be cleared in a prioritized manner. Emergency and main access routes are the first priority. Primary pedestrian and ADA routes, vehicular drives and parking lots, including snow emergency "No Parking" areas are the second priority. Minimal use walks and roads, snow emergency alternate parking lots and other secondary parking lots are the third priority and will be cleared last. Fire hydrants, storm drains, mechanical room access and basement access will be cleared the day following a storm. Athletic fields will be cleared only as resources are available. Anti-icing and de-icing procedures will be performed as deemed necessary.

Detailed Process for Systematic Snow Removal:

- When roads/walkways become icy, salting will begin.
- If snow accumulates, custodial and maintenance staff shovel or use snow sweeper.

Weather Forecasting Service Monitoring - The forecast shall be monitored during times of potential snow warnings affecting the district's facilities. Additional forecasts may be used to confirm data; however, one source of forecast service shall serve as the primary planning tool and will be retained as part of the snow documentation. The National Weather Service is the primary service used.

SECTION 2: CAMPUS SAFETY AND CONTACT INFORMATION

If the district staff encounters any hazardous conditions during normal working hours, (7:00am to 4:30pm), please contact the Administration Office at 575.433.0100 or the Maintenance Office at 575.433.1728.

The Superintendent and Director of Operations (or designee) will be responsible for monitoring weather conditions outside normal working hours and take appropriate action, notifying staff via phone and Social Media.

SECTION 3: PRE-SEASON PREPARATION CHECKLIST

- Update snow response plan to reflect the addition or deletion of properties, changes in staffing, changes with equipment and usage, budgeting constraints, changes with contracted services, and all other information that is necessary to keep this response plan up-to-date.
- Train employees in the safe operation of snow removal equipment and in handling snow and ice melting materials.
- Establish notification process for employee call-ins and issue a memorandum indicating responsibilities and guidelines for individuals involved in snow and ice removal.
- Perform inventory and inspection of equipment, parts, and materials to ensure that they are in proper working condition and/or stocked in appropriate quantities. Some examples include: plow blades, tire chains and repair links, snow blowers, shovels, scrapers, spreaders, tractors, trucks, boots, gloves, rain gear, goggles, anti-freeze, hydraulic oil, hoses, belts, chains, gear boxes, ice melting agents and abrasives, snow stakes, hydrant markers, visual flags, winter windshield wiper blades, and snow fencing.
- Attach snow removal implements to equipment.
- Ensure adequate stock of snow and ice melt materials.
- Locate hand tools and ice melt and spreaders for easy access.
- Identify areas where snow can be disposed of. Include areas that are accessible to large vehicles.
- Make necessary repairs and eliminate any protruding obstacles in parking lots, roads, and walkways.
- Update maps and listings of priorities, equipment routs, assignments, and zones of responsibility.
- Update the list of emergency support services (i.e. DOT etc.)
- Update lists of local emergency services such as hospitals, ambulance, police, fire, etc.
- Inspect roofs to determine if there is a need for snow guards.

SECTION 4: WINTER PROCEDURES CHECKLIST of Director of Operations/Designee

- Monitor weather through the National Weather Service, local radio stations and web.
- Regularly inspect campus for snow, ice and build-up on the roof systems. Coordinate removal.
- Inspect campus regularly to identify and repair storm damage including potholes (quick patch), signs and trees.
- Confirm adequate supply of materials and parts after each storm and restock as necessary.
- Inspect and inventory equipment and materials to determine need for repair and/or replacement and ensure adequate inventory.
- Maintain storm reports including snowfall, temperature, hours worked, equipment and materials used, overtime, etc.
- Evaluate performance of in-house employees and correct as necessary.
- Evaluate performance of contracted services and correct as necessary.

- Routinely check roofs to determine where potential snow slides may require closing and/or restricting of sidewalks.
- Monitor roof drains for potential ice build-up.
- Keep snow-handling equipment available and maintain appropriate inventories for late season storms.
- Routinely check the facilities for adverse conditions and take action as necessary.

SECTION 5: SNOW RESPONSE STAFF WINTER PROCEDURES CHECKLIST

- Monitor weather through the National Weather Service, local radio stations and web.
- Perform snow removal activities, as directed by manager.
- Advise Director of Maintenance of any unsafe or potentially hazardous conditions encountered during snow removal operations.
- Operate all assigned equipment in a safe and efficient manner.
- Perform maintenance inspections on assigned equipment and maintain the same in a neat and clean condition. Report and replace any damaged equipment.
- Wear appropriate clothing for winter weather conditions and utilize safety equipment provided.
- Ensure that stairs, roadways, parking lots, sidewalks and entryways are kept free of snow, slush and ice, which may cause hazardous footing.
- Exercise caution with the use of salt and ice melt around areas that border lawns or plantings.
- Keep fire hydrants, emergency equipment and drains clear of snow.
- Wash equipment, vehicles, and implement “after storms” cleaning procedures to help prevent corrosion.
- Ensure all gates are free and clear of snow and ice and operating properly.
- Routinely check roofs to determine where potential snow slides may require closing and/or restricting of sidewalks.
- Maintain and keep snow removal equipment in good mechanical condition.
- Monitor roof drains for potential ice build-up.
- After a winter storm and once any residual snow begins to thaw, all drains must be uncovered to avoid any drainage or re-freeze problems. All clogged drain lines should be reported promptly.
- Make sure handicap access is clear at all ramps and door opening buttons.

SECTION 6: EQUIPMENT/SUPPLIES INVENTORY

The Maintenance Department will inventory all related snow equipment, parts, and materials by October 1st each year. All equipment will be started, tested, tuned up, and checked for faulty parts; and repairs made. All equipment will be routinely tested prior to the first storm and throughout the entire snow season. Any essential backup and replacement inventory will be ordered by October 1st, and received/accounted for within the grounds storage facility by October 15th.

Snow-Removal Equipment

- Snow Shovels
- Snow Sweeper
- Ice Melt/Rock Salt
- Ice Melt Spreaders
- Backhoe/Tractor

SECTION 7: RECORD-KEEPING & DOCUMENTATION

Accurate and up-to-date records of storm conditions and department activities are a critical element of the snow response plan. Records are useful in tracking materials used and in planning future storms. Records are also essential in defending claims that may be brought against the district.

SECTION 8: TRAINING & SAFETY

The safety of the campus community and of the Facility Services' employees is of the utmost importance. Training of all employees involved in snow and ice removal operations is mandatory and will occur prior to any winter storm period. Depending on experience, employees will be trained on the safe operation of the types of equipment they will be operating and on tasks to be performed. Equipment may include tractors, shovels, spreaders, etc. This also includes walk-behind and hand held equipment. Winter equipment operation and tasks to be performed will be evaluated to determine the personal protective equipment (PPE) that is needed to ensure safety. Once the PPE is identified and purchased, employees will be trained how to use the PPE while operating equipment or performing tasks. All training will be conducted as per current OSHA standards and requirements.

Employee Safety Checklist

- Wear proper clothing and utilize proper personal protective equipment (PPE)
- Wear boots that provide good traction and proper insulation
- When loading and unloading snow and ice melt materials, use proper lifting mechanics:
 - Bend your knees
 - Use your legs to lift not your back
 - Turn your full body – avoid twisting
 - Use mechanical devices, if appropriate, such as a fork lift or hand truck
- Do not operate equipment without proper training and approval
- Take breaks from equipment operation a minimum of 15 minutes every 3 hours
- Protect exposed skin from environmental conditions
- Change clothes that become wet as soon as possible
- Warm cold body parts immediately – do not let body parts become numb
- Change socks frequently
- Report broken or damaged equipment as soon as possible.
- Report all suspected cold weather injuries to a manager immediately

PPE Recommendations:

- Water Proof Boots
- Gloves
- Safety glasses
- Coveralls

SECTION 9: SNOW REMOVAL PLAN

Snow removal becomes an “all hands on deck” event for the Hobbs Municipal School District to successfully remove the snow from necessary areas of campus. When mechanics and carpenters are required to shovel snow, the following procedures should be followed:

- Staff will be divided into groups and held responsible for a particular location/s.
- Each group will have one person (group leader) in radio contact with base.
- Groups are to stay together until their location is completely cleared, salting areas as necessary.
- After the location is completely cleared, the group leader will call via radio to see if any other groups still need help. If no other group needs help, contact Maintenance Office; if campus is cleared and group is working overtime, Director of Maintenance will give the clearance for the group to leave campus.
- Stay in groups, no one should be by themselves for safety reasons.

On-campus shoveling expectations:

- 10 foot wide side of railings on steps
- Small walkways where a machine is unable to reach
- All landings that are entrances to buildings
- All handicap ramps
- All steps leading to mechanical rooms or basement egresses
- All primary and secondary fire exits
- All entrances including handicap locations and door button

SECTION 10: POST-SEASON WORK

- Repair all lawn damage to sides of pathways or sidewalks caused by snow plowing or snow removal.
- Repair all disturbed curbing or roadway caused by plowing or snow removal.

Other requirements:

- Workers performing work must be in telephone or radio contact with Maintenance Department.
- Snow removal equipment must be on site within one (1) hour of the beginning of the snowfall.

SECTION 11: INCLEMENT WEATHER POLICY

See 22.0 Attachment

PROCEDURES FOR BAD WEATHER 2023-24

*****6:00 a.m.*****

***Announce either a three-hour delay or cancel for the day.

If after announcing a three-hour delay, Cancellation of school must be decided by **9:00 a.m.**

Principals, Secretaries, Maintenance and Custodial Staff will still report as close to regular time as safety allows – unless specified differently. The delayed start times are: Elementary – 10:45; Middle School – 11:20; Freshman School – 11:20; Alt HS 11:00 am and HHS – 11:20 a.m.

HMS Maintenance Work Order Survey

How would you rate the overall quality of the work order system?

Are the work orders being completed in a timely manner?

Was the work area cleaned up after completion of the job?

How would you rate our communication regarding work orders?

Does the HMS maintenance staff follow all safety and security measures when completing work orders?

6. (Optional) Please comment on areas we need to improve and in areas we have success in.

- * Your staff is very helpful and kind. They will help do what they can to make our buildings better.
- * The service tech should have someone sign off that the work order is completed. There is a lot of confusion when they say they did something, and we say it isn't complete. Have service techs update department staff if parts are required and the work order has been put on hold.
- * Our maintenance crew is top notch! We appreciate all their efforts.
- * Many times, work orders are not completed in a timely manner. There is no communication as to why they haven't been started or completed the work orders. It requires the Administrators to call and ask about the status of the work order.
- * Our maintenance department keeps our building in very good shape.
- * Work orders sit pending for long periods of time and then all of the sudden multiple will be closed out at once, often several that I know were never completed.
- * They do a good job.
- * School office does not always know if a work order has actually been completed even though it is marked closed; items marked closed before work is done
- * When an order has been completed, we are not informed. Maintenance can just inform the admin or custodians, or office when completed.

Each HMS School participated in this survey. This information is being used to improve in the quality of work, communication, and quick completion of the work orders.
